Subject Code: R10204/R10

Set No - 1

I B.Tech II Semester Regular Examinations Oct./Nov. - 2013

ENGINEERING CHEMISTRY - II

(Common to All Branches)

Time: 3 hours

Max. Marks: 75

**Answer any FIVE Questions
All Questions carry equal marks**

*** * * * ***

- 1.(a) Explain free radical mechanism with example.
(b) Write about the preparation and properties of bakelite.
(c) Write notes on biodegradable polymers. [5+6+4]
- 2.(a) Write notes on (i) Bullet proof plastics. (ii) Glass Fiber reinforced plastics.
(b) With a neat sketch explain extrusion moulding [10+5]
- 3.(a) Write in detail about compounding of rubber.
(b) Give any five engineering applications of elastomers. [9+6]
- 4.(a) Discuss any two methods for the synthesis of carbon nanotubes.
(b) What are fullerenes? Give any four engineering applications of fullerenes. [8+7]
- 5.(a) Describe the manufacture of Portland cement by rotary kiln method.
(b) Discuss the following properties of refractories
(i) Refractoriness under load (ii) Refractoriness [9+6]
- 6.(a) Explain moving bed catalytic cracking method with a neat labeled diagram.
(b) Explain the terms octane number and cetane number.
(c) Write any four applications of lubricants. [7+4+4]
- 7.(a) Explain differential aeration corrosion, & galvanic corrosion.
(b) Explain the constituents of paints.
(c) Differentiate between galvanizing and tinning. [6+5+4]
- 8.(a) Discuss the principles of green chemistry.
(b) Explain in detail any two methods of green synthesis. [5+10]

Subject Code: R10204/R10

Set No - 2

I B.Tech II Semester Regular Examinations Oct./Nov. - 2013

ENGINEERING CHEMISTRY - II

(Common to All Branches)

Time: 3 hours

Max. Marks: 75

**Answer any FIVE Questions
All Questions carry equal marks**

*** * * * ***

- 1.(a) Explain the significance of Zeigler-Natta Catalyst.
(b) Explain addition and condensation polymerization with example.
(c) Write about the preparation and properties of polyvinyl chloride. [5+5+5]
- 2.(a) Write notes of fiber reinforced plastics.
(b) With a neat sketch explain extrusion moulding.
(c) Give any four properties of plastics. [5+5+5]
- 3.(a) Explain how Buna-N rubber is prepared? What are its important applications?
(b) What are the limitations of natural rubber? How does vulcanization improve the properties of rubber?
(c) Give any five engineering applications of elastomers. [4+7+4]
- 4.(a) Describe the production of carbon nanotubes by laser ablation method with a neat sketch.
(b) Write the engineering applications of carbon nanotubes.
(c) Discuss the properties of fullerenes. [5+5+5]
- 5.(a) Explain setting and hardening of cement with suitable chemical equations.
(b) Write notes on glazed and unglazed clays.
(c) Explain the classification of refractories based on chemical composition with examples. [7+4+4]
- 6.(a) Write short notes on fractional distillation of petroleum with a neat sketch diagram.
(b) Write notes on antiknocking agents
(c) Describe the mechanism of thick film and thin film lubrication. [5+3+7]
- 7.(a) Explain the mechanism of pitting and galvanic corrosion.
(b) Discuss on the metallic coatings (i) Electroplating (ii) Electroless plating.
(c) Explain how corrosion can be controlled by proper selection and designing. [5+6+4]
- 8.(a) Explain aqueous phase method and supercritical fluid extraction method of green synthesis.
(b) Discuss any five applications of green chemistry. [10+5]

Subject Code: R10204/R10

Set No - 3

I B.Tech II Semester Regular Examinations Oct./Nov. - 2013

ENGINEERING CHEMISTRY - II

(Common to All Branches)

Time: 3 hours

Max. Marks: 75

**Answer any FIVE Questions
All Questions carry equal marks**

*** * * * ***

- 1.(a) Write about the preparation and properties of polycarbonates
(b) Explain the physical and mechanical properties of polymers
(c) What is glass transition temperature? [4+8+3]
- 2.(a) Write notes on
(i) Fiber reinforced plastics (ii) Bullet proof plastics
(b) With a neat sketch explain extrusion and compression moulding. [8+7]
- 3.(a) Write in detail about compounding of rubber.
(b) Explain how polyurethane rubber is prepared? What are its important applications?
(c) Write the structure of natural rubber and Gutta Percha. [8+4+3]
- 4.(a) Describe the production of carbon nanotubes by arc discharge method with a neat sketch.
(b) Explain the properties of carbon nanotubes.
(c) Discuss on the applications of fullerenes. [5+5+5]
- 5.(a) Write notes on glazed & unglazed ceramics. Give any four engineering applications of ceramics.
(b) Classify types of refractories based on chemical composition with examples.
(c) Discuss the effect of CO₂ on cement concrete. [8+4+3]
- 6.(a) What is meant by cracking of oil? Explain fluid bed catalytic cracking method with a labeled diagram.
(b) Explain the terms octane number and cetane number.
(c) Discuss on (i) Cloud and Pour Point (ii) Aniline Point [6+4+5]
- 7.(a) Explain the factors affecting corrosion.
(b) What is the role of sacrificial anode in corrosion control?
(c) State and explain Pilling Bedworth rule. [8+4+3]
- 8.(a) Describe the phase transfer catalyst for green synthesis.
(b) Discuss the principles of green chemistry.
(c) Discuss on the (five) applications of green chemistry. [4+6+5]

Subject Code: R10204/R10

Set No - 4

I B.Tech II Semester Regular Examinations Oct./Nov. - 2013

**Answer any FIVE Questions
All Questions carry equal marks**

*** * * * ***

- 1.(a) Write notes on stereospecific polymers.
(b) Write about the preparation and properties of Teflon.
(c) Explain the physical and mechanical properties of polymers. [4+4+7]
- 2.(a) With a neat sketch explain extrusion moulding and injection moulding.
(b) Write notes of fiber reinforced plastics. [10+5]
- 3.(a) What are the drawbacks of natural rubber? How does vulcanization improve the properties of rubber?
(b) Write about the preparation and properties of polyurethanes.
(c) Give any five engineering applications of elastomers. [7+4+4]
- 4.(a) Describe the production of carbon nanotubes by arc discharge and chemical vapour deposition method.
(b) Write the (atleast three each) engineering applications of carbon nanotubes and fullerenes. [9+6]
- 5.(a) Explain setting and hardening of cement with suitable chemical reactions.
(b) Write notes on (i) Thermal spalling (ii) Refractoriness
(c) Define glazed and unglazed ceramics. [7+4+4]
- 6.(a) Write short notes on refining and reforming of gasoline.
(b) Describe Fischer Tropsh method with a neat labeled diagram.
(c) Describe the mechanism of extreme pressure lubrication. [8+4+3]
- 7.(a) Discuss how corrosion can be minimized using the cathodic protection method.
(b) Explain differential aeration corrosion and pitting corrosion.
(c) Discuss the differences between tinning and galvanizing [6+6+3]
- 8.(a) Explain in detail any three methods of green synthesis
(b) Discuss on the applications of green chemistry. [12+3]

MATHEMATICS - II

(Common to All Branches)

Time: 3 hours**Max. Marks: 75**

Answer any FIVE Questions
All Questions carry equal marks

* * * * *

- 1.(a) Evaluate $\int_0^{\infty} \frac{e^{-t} \sin^2 t}{t} dt$ using Laplace transforms.
 (b) Find $L[(t^2 + e^{-t}) \sin 3t]$ [8+7]
- 2.(a) Find $L^{-1} \left[\frac{s+1}{(s^2+2s+2)^2} \right]$
 (b) Solve $y'' + y = e^{-2t} \sin t, y(0) = y'(0) = 0$ using Laplace transforms. [8+7]
- 3.(a) Find the Fourier series of $f(x) = x^2$ for $0 < x < 2\pi$.
 (b) If $f(x) = 1 - \frac{x}{L}$, in $0 < x < L$, then find the half range Fourier cosine series. [8+7]
4. Find the Fourier cosine and sine integrals of $f(x) = \begin{cases} \sin x & 0 < x \leq \pi \\ 0 & x > \pi \end{cases}$. [15]
- 5.(a) Form the partial differential equation by eliminating the arbitrary function f from $xyz = f(x+y+z)$.
 (b) Solve $p \tan x + q \tan y = \tan z$. [8+7]
6. A bar of length, laterally insulated, has its ends A and B kept at 0°C and 100°C respectively until steady state conditions prevail. If the temperature at B is suddenly reduced to 0°C and kept so, while that of A is maintained at 0°C . Find the temperature $u(x,t)$ in the bar at any subsequent time. [15]
- 7.(a) Find $Z(n \cos n\theta)$.
 (b) Solve $a_{n+2} - 2a_{n+1} + a_n = 3n + 5$ using Z transforms. [8+7]
- 8.(a) Evaluate $\int_0^{\infty} a^{-bx^2} dx$.
 (b) Prove that $\beta(p, q) = \beta(p+1, q) + \beta(p, q+1)$. [8+7]

MATHEMATICS - II

(Common to All Branches)

Time: 3 hours

Max. Marks: 75

Answer any FIVE Questions
All Questions carry equal marks

* * * * *

- 1.(a) Find $L \left[\int_0^t \frac{\sin u}{u} du \right]$.
 (b) Find $L[e^{-t} \sin^2 t]$. [8+7]

- 2.(a) Find $L^{-1} \left[\frac{16}{(s-2)(s+2)^2} \right]$ using convolution theorem.
 (b) Solve $y'' + 7y' + 10y = 4e^{-3t}$, $y(0) = 0$, $y'(0) = -1$ using Laplace transforms. [8+7]

- 3.(a) Find the Fourier series of $f(x) = x \sin x$ in $(-\pi, \pi)$.
 (b) If $f(x) = 1 - \frac{x}{L}$, in $0 < x < L$, then find half range Fourier sine series. [8+7]

4. Represent $f(x)$ as an exponential Fourier transform, where

$$f(x) = \begin{cases} \sin x & 0 < x \leq \pi \\ 0 & x > \pi \end{cases}$$
 and deduce that $f(x) = \frac{1}{\pi} \int_0^\infty \frac{\cos ax + \cos a(\pi-x)}{1-a^2} da$ [15]

- 5.(a) Form the partial differential equation of all spheres whose centers lie on z-axis.
 (b) Solve $(y^2+z^2)p - xyq + xz = 0$. [8+7]

6. Find the displacement of a string stretched between two fixed points at a distance $2c$ apart, when the string is initially at rest in equilibrium position and points of the string are given initial velocity $v = \begin{cases} \frac{x}{c} & 0 < x < c \\ \frac{2c-x}{c} & c < x < 2c \end{cases}$, where x is the distance measured from one end. [15]

- 7.(a) Find $Z(\cosh n\theta)$.
 (b) Solve $a_{n+2} - 4a_{n+1} + 3a_n = 5^n$ using Z transforms. [8+7]

- 8.(a) Evaluate $\int_0^2 x \sqrt[3]{8-x^3} dx$.
 (b) Prove that $\beta(p, q) = \frac{(m-1)!(n-1)!}{(m+n-1)!}$. [8+7]

MATHEMATICS - II

(Common to All Branches)

Time: 3 hours**Max. Marks: 75**

Answer any FIVE Questions
All Questions carry equal marks

* * * * *

- 1.(a) Find $L[f(t)]$, where $f(t) = \begin{cases} 1 & 0 \leq t < 2 \\ -1 & 2 \leq t \leq 4 \end{cases}$ and $f(t+4) = f(t)$.
 (b) Find $L[t^{\frac{7}{2}} e^{3t}]$. [8+7]
- 2.(a) Using convolution theorem, find $L^{-1} \left[\frac{s^2}{(s^2+a^2)(s^2+b^2)} \right]$.
 (b) Solve $y^{11} + n^2 y = a \sin(nt + 2)$, $y(0) = 0$, $y'(0) = 0$ using Laplace transforms. [8+7]
- 3.(a) Find the Fourier series of $f(x) = x \cos x$ in $(-\pi, \pi)$.
 (b) If $f(x) = \sin\left(\frac{\pi x}{L}\right)$, in $0 < x < L$, then find half range Fourier sine series. [8+7]
4. Find Fourier cosine transform of $f(x) = e^{-ax}$ for $x \geq 0$, $a > 0$ and evaluate $\int_0^{\infty} \frac{\cos \alpha x}{a^2 + \alpha^2} d\alpha$. [15]
- 5.(a) Form the partial differential equation by eliminating the arbitrary constants a and b from $z = xy = y\sqrt{x^2 + a^2 + b^2}$.
 (b) Solve $(x^2 - y^2 - yz)p + (x^2 - y^2 - xz)q = z(x-y)$. [8+7]
6. Solve the Laplace equation for $u(x,y)$ satisfying the conditions $u(0,y)=0$, $u(a,y) = 0$, $u(x,b)=0$ and $u(x,0) = f(x)$. [15]
- 7.(a) Find $Z\left(a^n \frac{e^{-a}}{n!}\right)$.
 (b) Solve $a_{n+2} + 2a_{n+1} + a_n = n$, with $a_0 = a_1 = 0$, using Z transforms. [8+7]
- 8.(a) Evaluate $\int_0^1 x^{\frac{3}{2}} (1 - x^2)^{5/2} dx$.
 (b) Prove that $\beta(p, q) = \frac{\Gamma(m)\Gamma(n)}{\Gamma(m+n)}$. [8+7]

MATHEMATICS - II

(Common to All Branches)

Time: 3 hours

Max. Marks: 75

Answer any FIVE Questions
All Questions carry equal marks

* * * * *

- 1.(a) If f(t) = (e^-at - e^-bt)/t, find L [f(t)].
(b) Find L[cosh at cos bt]. [8+7]
2.(a) Solve y'' + 2y' + 5y = e^-t sin t, y(0) = 0, y'(0) = 1 using Laplace transforms.
(b) Determine function f(t) for which L[f(t)] = 1/2 ln((s+1)/(s-1)). [8+7]
3.(a) Derive the Fourier series of f(x) = (pi-x)/2 in (0, 2pi).
(b) If f(x) = sin(pi*x/L), in 0 < x < L, then find half range Fourier cosine series. [8+7]
4. Find Fourier sine transform of f(x) = e^-ax for x >= 0, a > 0 and evaluate integral from 0 to infinity of (alpha sin ax)/(a^2 + alpha^2) d alpha. [15]
5.(a) Form the partial differential equation for the family of all circles with given radius r and their centers in xy-plane.
(b) Solve yp + xq + pq = 0. [8+7]
6. A string of length L is fastened at both ends A and C. At a distance 'b' from A, the string is transversely displaced to a distance 'd' and is released from rest when it is in this position. Find the subsequent displacement of the string. [15]
7.(a) Find Z(ncosn theta).
(b) Solve a_{n+2} + 4a_{n+1} + 3a_n = 3^n, with a_0 = 0, a_1 = 1 using Z transforms. [8+7]
8.(a) Evaluate integral from 0 to 1 of ((x)/(1-x^3))^(1/2) dx.
(b) Prove that Gamma(1/2) = sqrt(pi). [8+7]

Answer any FIVE Questions
All Questions carry equal marks

* * * * *

- 1.(a) Write down time dependent and time independent Schrodinger wave equations.
(b) Show that the energy of an electron confined in a one dimensional potential well of length L and infinite depth is quantized.
(c) The electron trapped in potential well cannot have zero energy. Explain, why?
[4+9+2]
- 2.(a) Explain the terms 'Drift Velocity' and 'Carrier Mobility'.
(b) What are assumptions of classical free electron theory?
(c) Based on classical free electron theory, derive an expression for electrical conductivity in metals.
[3+4+8]
- 3.(a) Discuss with suitable mathematical expressions, the motion of an electron in a periodic potential.
(b) Explain how the above theory leads to the concept of band structure of solids.
(c) What is effective mass of electron?
[8+4+3]
- 4.(a) What are ferromagnetic materials? Write notes on hysteresis.
(b) How would you use the hysteresis curves to select material for the construction of permanent magnets?
(c) Diamagnetic Al_2O_3 is subjected to external magnetic field of 10^5 A/m. Evaluate magnetization and magnetic flux density in Al_2O_3 . (Susceptibility of $Al_2O_3 = -5 \times 10^{-5}$).
[9+2+4]
- 5.(a) Explain the significance of three critical parameters of superconductors.
(b) Explain ac and dc Josephson's effect. Discuss the applications of Josephson's effect.
[6+9]
- 6.(a) What do you understand by dielectric constant? Define dielectric susceptibility. Derive the relation between dielectric constant and dielectric susceptibility.
(b) Explain electronic polarisability and show that electronic polarisability for a mono atomic gas increases as the size of the atom becomes larger.
[5+10]
- 7.(a) Write the expressions for electron and hole concentrations in an intrinsic semiconductor and hence derive the expression for Fermi energy in an intrinsic semiconductor.
(b) How does the electrical conductivity vary with temperature for an intrinsic semiconductor?
(c) If the effective mass of electron is equal to twice the effective mass of hole, determine the position of the Fermi level in an intrinsic semiconductor from the centre of forbidden gap at room temperature.
[6+5+4]
8. Write a brief note on
(i) Nano materials
(ii) Flux quantization
(iii) Hall effect
[5+5+5]

Answer any FIVE Questions
All Questions carry equal marks

* * * * *

- 1.(a) Show that the solution of Schrodinger's equation for a particle in an infinite potential well leads to the concept of quantization of energy. Obtain Eigen functions for the particle. Show necessary wave forms.
(b) Find the lowest energy of an electron confined to move in a one dimensional box of length 1Å. Express the result in electron volts. [11+4]
- 2.(a) What are the drawbacks of the classical free electron theory?
(b) Derive an expression for electrical conductivity of a conducting material based on quantum mechanical treatment.
(c) Find the relaxation time of conduction electrons in a metal if its resistivity is $1.54 \times 10^{-8} \Omega m$ and it has 5.8×10^{28} conduction electrons/ m^3 . [3+8+4]
- 3.(a) Discuss with suitable mathematical expressions, the motion of an electron in a periodic potential.
(b) Explain how the above theory leads to the concept of band structure of solids.
(c) What is effective mass of electron? [8+4+3]
- 4.(a) Explain magnetic flux density, B, magnetic field strength, H and Magnetisation M. Derive the relation between them.
(b) Describe dia, para and ferromagnetic materials. Explain their classification on the basis of permanent magnetic moment. [6+9]
- 5.(a) What is superconductivity? Explain Meissner effect. Describe type-I and type-II superconductors.
(b) Discuss the applications of superconductors. [12+3]
- 6.(a) What do you understand by dielectric constant? Define dielectric susceptibility. Derive the relation between dielectric constant and dielectric susceptibility.
(b) Explain electronic polarisability and show that electronic polarisability for a mono atomic gas increases as the size of the atom becomes larger. [5+10]
- 7.(a) Write notes on drift and diffusion currents.
(b) Obtain the expression for density of electrons in the conduction band of an n-type extrinsic semiconductor. [6+9]
8. Write a brief note on
(i) Nano tubes
(ii) Clausius-Mosotti equation
(iii) Bloch theorem [5+5+5]

Answer any FIVE Questions
All Questions carry equal marks

* * * * *

- 1.(a) Describe how changes in society through technology can lead to wealth generation in a poor country like India.
(b) Write the antonyms:
(i) Negate (ii) Abundance (iii) Vulnerable
(iv) Straight (v) Indolence [10+5]
- 2.(a) Explain the views of L.A. Hill in 'Principles of Writing'.
(b) Supply the quantifiers: (some, no, any, all, a lot of, many, much)
(i) Are there ---- eggs in the basket?
(ii) There is ---- sugar in the tin.
(iii) She knows ----- stories.
(iv) Can you give me ----- advice?
(v) There are ----- vehicles on the road. [10+5]
- 3.(a) What are the suggestions made by Russell to nations and general public for the maintenance of peace?
(b) Fill in the blanks with suitable conjunctions:
(i) I came early----- everyone was late.
(ii) Bread ----- butter make a good breakfast.
(iii) The boy was lazy----- the teacher punished him.
(iv) She is a good singer----- a poor dancer.
(v) ----- it rains, I will not go to school. [10+5]
- 4.(a) Describe the behavior of the local population as narrated by George Orwell.
(b) Correct the following sentences:
(i) He is an university student
(ii) We discussed about the matter.
(iii) He told to me that he was a teacher.
(iv) He is sick but he cannot attend the school.
(v) He is the tallest of the two. [10+5]
- 5.(a) 'Adaptability' is one of the personal traits that helps to achieve the career goal'- Explain.
(b) Fill in the blanks with correct prepositions:
(i) The cat is----- the sofa.
(ii) He looked -----.
(iii) This book is written----- Adams.
(iv) He waited there ----- two hours.
(v) I don't agree ----- you. [10+5]

- 6.(a) Write a report to the Chief Engineer on the necessity of solar energy devices. You are working in State Electricity Board as Assistant Engineer.
- (b) Read the passage and answer the questions:

Being stupid and having no imagination, animals often behave far more sensibly than men. Efficiently and by instinct they do the right, appropriate thing at the right moment – eat when they are hungry, look for water when they feel thirsty, make love in the mating season, rest or play when they have leisure.

Men are intelligent and imaginative; they look backwards and ahead; they invent ingenious explanation, or observe phenomena; they devise elaborate and roundabout means for the achievement of remote ends. Their intelligence which has made them the masters of the world often causes them to act like imbeciles. No animal, for example, is clever and imaginative enough to suppose that an eclipse is a work of a serpent devouring the sun. And only a human being would dream of making ritual gestures, in the hope of influencing for his own benefit the outside world. Man being endowed with reason and imagination, wastes half his time and energy in doing things that are completely idiotic. In time true experience teaches formulas and ceremonial gestures would not give him what he wants. But until experience has taught him, he takes surprisingly long time to learn that man’s behavior in many respects is far sillier than that of the animal’s.

QUESTIONS

- (i) Which factor helps the animals to do the right thing at right time?
- (ii) How can you say that men act like imbeciles?
- (iii) Why do men observe rituals?
- (iv) How does man waste his time?
- (v) Compare man’s behavior with that of an animal. [10+5]

- 7.(a) Make a presentation with 5 to 6 slides on ‘Tree Plantation’.
- (b) Fill in the blanks with suitable articles.

- (i) I met ----- university student.
- (ii) I saw him at----- museum.
- (iii) Jone is ----- Italian.
- (iv) He is ----- honorable person.
- (v) Shall we have----- drink? [10+5]

- 8.(a) Write a letter to a book seller placing an order for the books. Give the list of the books and write a covering letter.
- (b) Match the following.

A	B
(i) Didactic	Pound foolish
(ii) Beg, Borrow	Disaster
(iii) Pennywise	Quantifier
(iv) Earthquake	Or steal
(v) A little	Teaching

[10+5]

Answer any FIVE Questions
All Questions carry equal marks

(iii) I have ----- work to do.
(iv) Did you say -----?
(v) Would you like---- to eat? [10+5]
- 3.(a) Justify Russell's statement that world is 'full of conflicts'.
(b) Fill in the blanks with suitable conjunctions:
(i) Did you come by bus----- train?
(ii) He is a good worker ----- he got a promotion.
(iii) It started raining ----- we were playing.
(iv) Let us go home----- it gets dark.
(v) She looked upset ----- the results were announced. [10+5]
- 4.(a) Comment on Orwell's decision to shoot the elephant.
(b) Correct the following sentences:
(i) He described about his journey.
(ii) Ram worked hard so he failed.
(iii) Little water in the pot quenched the thirst of the crow.
(iv) The leader did anything for the people.
(v) He ran fastly. [10+5]
- 5.(a) Write about motivation and commitment.
(b) Fill in the blanks with correct prepositions.
(i) The cat is ----- the sofa.
(ii) He looked ----- the sky.
(iii) This book is written ----- Graham Swift.
(iv) He waited there----- two hours.
(v) I don't agree ----- you. [10+5]

6.(a) Write a report to the Managing Director, Arvind Textiles,6th cross, Peters Lane, Calcutta on the feasibility of starting a new Textile Industry in Hyderabad. You are the sales manager of the company .

(b) Read the passage and answer the questions:

The philosophers have often maintain that happiness, like beauty, is a by-product, a lovely but accidental acquisition. As the bloom appears on flowers or on the face of youth, so does bliss slip into our lives, coming the more surely the less it is pursued. You set out to do something, you pin your mind on the purpose, you do the job and lo! Happiness descends upon you. But you must not think about the pleasure; stick to the deed, the action and there comes the joy, a secret visitation. The nature of the deed does not matter greatly, so long as your heart and brain and the muscles are in the work. To hit a ball correctly or to compose a masterpiece, the process is the same. Concentrate and the mysterious felicity will follow. The way to ensure happiness is not to seek it. So they say, but mankind has never believed it. Mankind, in the main is more concerned with pleasure than with happiness; it believes in a “good time” which is made good by the very reason of our intention to enjoy. This fervor of holiday spirit, this instinctive passion for carnival, is perhaps inarticulate but quite an unquestionable response to the grave philosopher, who resolves happiness into an accident of successful action.

Questions

- (i) What is an accidental acquisition?
- (ii) How does happiness descend on us ?
- (iii) What does the philosopher say about happiness?
- (iv) Give the list of the tasks for which the process is the same.
- (v) Explain the nature of mankind.

[10+5]

7.(a) Prepare a presentation on ‘Eco Friendly Power generation’. Explain with the help of 5 to 6 slides.

(b) Fill in the blanks with suitable articles:

- (i) I met ----- one-eyed man at the station.
- (ii) Can you play----- instrument?
- (iii) ----- Bible is ----- holy book.
- (iv) It is ----- unicorn.

[10+5]

8.(a) Write a complaint letter to the Municipal Commissioner about the bad state of roads and drainage system in your locality.

(b) Match the following:

- | A | B |
|-----------------------|-------------|
| (i) Etiquette | vegetation |
| (ii) Commission | calamity |
| (iii) Flora and fauna | punctuation |
| (iv) Tornado | members |
| (v) Semi-colon | decorum |

(b) Fill the blanks with conjunctions:
(i) -----he failed in the exam, he left the hostel.
(ii) ----- he is poor ,he is generous.
(iii) I dropped the jar ----- it didn't break.
(iv) ----- it is hot outside, the children are playing.
(v) Ram ----- Shyam are good friends. [10+5]
- 4.(a) Describe in your own words the actual shooting of the elephant in Orwell's work.
(b) Correct the following sentences.
(i) Despite of his illness, he attended the meeting.
(ii) She is angry on me.
(iii) He cut the apple by the knife.
(iv) Do you see blue sky ?
(v) There is many milk in the bottle. [10+5]
- 5.(a) Write an essay on 'Stress Management'.
(b) Fill in the blanks with correct prepositions.
(i) He was ----- time for presentation.
(ii) The thief was caught ----- the police.
(iii) He congratulated the team ----- their success.
(iv) The Exam starts ----- 9 a.m.
(v) She is angry ----- me. [10+5]

6.(a) The management of a newspaper wants to start a weekly magazine and has asked one of its committee members to make a study of the readership and send a report.

(b) Read the passage and answer the questions:

Being stupid and having no imagination, animals often behave far more sensibly than men. Efficiently and by instinct they do the right, appropriate thing at the right moment – eat when they are hungry, look for water when they feel thirsty, make love in the mating season, rest or play when they have leisure.

Men are intelligent and imaginative; they look backwards and ahead; they invent ingenious explanation, or observe phenomena; they devise elaborate and roundabout means for the achievement of remote ends. Their intelligence which has made them the masters of the world often causes them to act like imbeciles. No animal for example is clever and imaginative enough to suppose that an eclipse is a work of a serpent devouring the sun. And only a human being would dream of making ritual gestures, in the hope of influencing for his own benefit the outside world. Man being endowed with reason and imagination, wastes half his time and energy in doing things that are completely idiotic. In time true experience teaches formulas and ceremonial gestures would not give him what he wants. But until experience has taught him, he takes surprisingly long time to learn that man's behavior in many respects is far sillier than that of the animal's.

QUESTIONS

(i) Which factor helps the animals to do the right thing at the right time?

(ii) How can you say that men act like imbeciles?

(iii) Why do men observe rituals?

(iv) How does man waste his time?

(v) Compare man's behavior with that of an animal. [10+5]

7.(a) Make a presentation on the necessity to build check dams near your area to store water during rainy season .Give the details of the available area of the cultivable land,location etc.... Prepare 5 or 6 slides.

(b) Fill in the blanks with suitable articles.

(i) It is ----- wonderful painting.

(ii) I have ----- one rupee coin with me

(iii) He is ----- idiot.

(iv) ----- Ramayana is ----- great epic. [10+5]

8.(a) Write a letter to your father inviting him to attend your convocation ceremony.

(b) Match the following.

A

(i) Didactic

(ii) Beg, Borrow

(iii) Pennywise

(iv) Earthquake

(v) A little

B

Pound foolish

Disaster

Quantifier

Or steal

1. Inscribe a regular heptagon inside the given circle of 68 mm diameter. [15]
2. Two points A and B are in the H.P. The point A is 30 mm in front of the V.P., while B is behind the V.P. The distance between their projectors is 75 mm and the line joining their top views makes an angle of 45° with xy. Find the distance of the point B from the V.P. [15]
3. The top view of a 75 mm long line AB measures 65 mm, while the length of its front view is 50 mm. Its one end A is in the H.P. and 12 mm in front of the V.P. Draw the projections of AB and determine its inclinations with the H.P. and the V.P. [15]
4. Draw a regular hexagon of 40 mm side, with its two sides vertical. Draw a circle of 40 mm diameter in its centre. The figure represents a hexagonal plate with a hole in it and having its surface parallel to the V.P. Draw its projections when the surface is vertical and inclined at 30° to the V.P. Assume the thickness of the plate to be equal to that of a line. [15]
5. A hexagonal pyramid, base 25 mm side and axis 50 mm long, has an edge of its base on the ground. Its axis is inclined at 30° to the ground and parallel to the V.P. Draw its projections. [15]
6. A cylinder of base diameter 40 mm and axis 55 mm long rests on H.P. on a point on the circumference of the base with its axis inclined at 45° to H.P. and parallel to V.P. Draw its projections. [15]

7. Draw the front, top and side views for the following figure. All dimensions are in mm.

8. Draw the isometric projection of a hollow rectangular prism of base 50 X 40 mm (outside), height 75 mm and thickness 8 mm when its axis is horizontal. [15]

1. Construct a vernier scale of R.F = 2 to show cm, $1/10^{\text{th}}$ of cm and $1/100^{\text{th}}$ of cm to read upto 9 cm. Mark on the scale the lengths 7.02 cm and 2.25cm. [15]
2. The front view of a line, inclined at 30° to the V.P. is 65 mm long. Draw the projections of the line, when it is parallel to and 40 mm above the H.P., its one end being 30 mm in front of the V.P. [15]
3. The end A of a line AB is in the H.P. and 25 mm behind the V.P. The end B is in the V.P. and 50 mm above the H.P. The distance between the end projectors is 75 mm. Draw the projections of AB and determine its true length, traces and inclinations with the two planes. [15]
4. Draw the projections of a regular pentagon of 40 mm side, having its surface inclined at 30° to the H.P. and a side parallel to the H.P. and inclined at an angle of 60° to the V.P. [15]
5. Draw the projections of a square pyramid of 32 mm side of base and axis 55 mm. It is resting on H.P. on one of its base corners with a base side containing the corner making 30° with H.P. The axis is inclined at 30° to V.P. and is parallel to H.P. The vertex is away from the V.P. [15]
6. Draw the projections of a pentagonal prism of 30 mm side of base and 65 mm long. It is lying on one of its longer edges on HP with one rectangular face perpendicular to H.P. such that the axis makes 60° with V.P. [15]

7. Draw the front, top and side views for the following figure. All dimensions are in mm.

8. Draw the isometric projection of a cylinder of base of 50 mm diameter and 70 mm height when it rests with its base on H.P. [15]

**Answer any FIVE Questions
All Questions carry equal marks**

*** * * * ***

1. The major and minor axes of an elliptical fish pond are 10 m and 6 m respectively. Draw the ellipse by Oblong Method. [15]
2. The length of the top view of a line parallel to the V.P. and inclined at 45° to the H.P. is 5 cm. One end of the line is 1.2 cm above the H.P. and 2.5 cm in front of the V.P. Draw the projections of the line and determine its true length. [15]
3. A line AB, 90 mm long, is inclined at 30° to the H.P. Its end A is 12 mm above the H.P. and 20 mm in front of the V.P. Its front view measures 65 mm. Draw the top view of AB and determine its inclination with the V.P. [15]
4. Draw the projections of a rhombus having diagonals 125 mm and 50 mm long, the smaller diagonal of which is parallel to both the principal planes, while the other is inclined at 30° to the H.P. [15]
5. Draw the projections of a cylinder 75 mm diameter and 100 mm long, lying on the ground with its axis inclined at 30° to the vertical plane. [15]
6. A pentagonal pyramid side of base 20 mm and axis 45 mm long rests with one of its corners on H.P. such that the base is inclined at an angle of 60° to H.P. and one side of base is perpendicular to V.P. Draw its projections. [15]

7. Draw the front, top and side views for the following figure. All dimensions are in mm.

8. Draw the isometric projection of a hollow rectangular prism of base 50 X 40 mm (outside), height 75 mm and thickness 8 mm when its axis is horizontal. [15]
- [15]

ENGINEERING DRAWING

(Common to EEE, MM, IT branches)

Time: 3 hours**Max. Marks: 75**

Answer any FIVE Questions
All Questions carry equal marks

* * * * *

1. Construct an ellipse when the major axis is 120 mm and the distance between the foci is 108 mm by Arcs of Circles Method and determine the length of the minor axis. [15]
2. Two points A and B are in the H.P. The point A is 30 mm in front of the V.P., while B is behind the V.P. The distance between their projectors is 75 mm and the line joining their top views makes an angle of 45° with xy. Find the distance of the point B from the V.P. [15]
3. A line AB, 65 mm long, has its end A in the H.P. and 15 mm in front of the V.P. The end B is in the third quadrant. The line is inclined at 30° to the H.P. and at 60° to the V.P. Draw its projections. [15]
4. Draw the projections of a regular pentagon of 40 mm side, having its surface inclined at 30° to the H.P. and a side parallel to the H.P. and inclined at an angle of 60° to the V.P. [15]
5. Draw the projections of a cylinder, base 30 mm diameter and axis 40 mm long resting with a point of its base circle on H.P. such that the axis is making an angle of 30° with H.P. and parallel to V.P. [15]
6. Draw the top and front views of a cone of base diameter 46 mm and height 65 mm lying with one of its generators on H.P. The axis is parallel to V.P. [15]
7. Draw the front, top and side views for the following figure. All dimensions are in mm. [15]

[15]

8. A pentagonal pyramid having the side of base 30 mm and the height of 70 mm is resting on one of the corners of the base and its axis is inclined to 30° to the H.P. Draw its projections and also prepare the isometric view of the pyramid.

[15]
