

PROF. K. AMARENDRA

M.Tech., PhD

PRINCIPAL

Student should possess at least one text book for each subject of their study. It may be noted that library is not a provider of text books to students for their routine studies. Library is a reservoir of various sources of information and knowledge and should utilize library as a source of additional information. They should cultivate the habit of studying in the library during library hours instead of learning the college soon after the class work is over.
