### Assessment Process for Add-on Courses

*In addition to the compulsory courses and assignments which are to be undergone by students, Add-on courses which are designed by faculty every year have contributed positively to gain extra credits in the student's portfolio or to make him/her enhance grades and marks.*

*This has proved to be a unique way in which a student can acquire the much-needed skill set to be able to deliver at the highest standards in the respective field of expertise as soon as they pass out. However, completing an Add-on Course successfully requires the fulfilment of below mentioned pre requisites:*

- *Student must maintain at least 80% attendance out of the total working hours specified for a particular Add-on Course*
- *Student must deliver an acceptable performance in the Viva Voce conducted by the course instructor of a given Add-on Course*
- *There must be an active participation of student in all the course related tasks assigned by the instructor that may include writing an application-oriented program, performing real time audit, executing simulation of specified circuits etc.,*
