## REPORT ON LANGUAGE SKILL DEVELOPMENT

The language skill development program plays an important role in the language learning process.

The focus is on the analysis and evaluation of receptive & productive skills based on various task-based/machine-based activities. It also focused on the development of target and scenario based communication processes using correct English for language learning purposes. It focuses on the development of students' language & communication skills, critical thinking, and problem solving skills through the understanding of 4 pillars of English Language viz. Listening, Speaking, Reading and Writing.

### Listening Skills

Listening is a receptive language skill which learners usually find the most difficult. This is often because they feel under unnecessary pressure to understand every word. The listener has to get oriented to the listening portion and be **all ears**. The listener is also required to be attentive. Anticipation is a skill to be nurtured in Listening.

In due course of listening, be in a lookout for the sign post words and one should be able to concentrate on understanding the message thoroughly. Listening Skills is enhanced by focusing on making the students listen to the sounds and help them with the right pronunciation of words.

In our Language Lab:

We progress from Attention to Accuracy through Situational Conversations/Role Play/Development of Argumentative Skills (using BEC audio in the Labs) and then the assessment is carried out.

## Speaking

Language is a tool for communication. We communicate with others, to express our ideas, and to know others' ideas as well. We must take into account that the level of language input (listening) must be higher than the level of language production. In primary schools, elocution and recitation are main sources to master the sounds, rhythms, and intonation of the English language through simple reproduction. Understanding of para-linguistic attributes such as voice quality, volume and tone, voice modulation, articulation, pronunciation etc helps to better this skill.

What we do?

We initiate with making a presentation on self- followed by the basics of Public speaking; Etiquette while following correct voice modulation and acceptable Paralinguistic features. As we gear up for our further sessions, we assess the ability of being able to use acquired Speaking Skills using Extempore-Continuous Evaluation tool. Finally, through self- reflection activity, they will be able to make a comparison in one's evolution in terms of one's communication ability in a semester

## Reading

Reading is a learning skill. It helps you improve all parts of the English language – vocabulary, spelling, grammar, and writing. It helps to develop language intuition in the corrected form. Then the brain imitates them, producing similar sentences to express the desired meaning. Using skimming or scanning technique to read quickly is highly effective. While reading underlining of key words is necessary.

Reading Skills help the students grasp the content and draw conclusions. The students should also make it a point to familiarize themselves with the jargons and new words by making reading a habit be

it reading newspapers, articles, books, magazines etc

What we do and assess in labs?

We expose them to the different techniques of reading and we take them through the practicesession through mind map. Then we assess the ability of Reading Comprehension using standard BEC Reading Comprehension using Continuous Evaluation tool.

Communication lab at 4<sup>th</sup> Floor

## Writing

Writing provides a learner with physical evidence of his achievements and he can measure his improvement. It helps to consolidate their grasp of vocabulary and structure, and complements the other language skills. It helps to understand the text and write compositions. It can foster the learner's ability

to summarize and to use the language freely. To write flawless language one should excel in the Writing Skills with the help of various methods. Importance should be given to composition and creative writing. One should also focus on coherence when it comes to writing a language.

In these sessions, we help them to identify and apply critical thinking skills in writing. Assessment session helps them to apply language & reflective skills to create a write up for given iconic images.

Teaching of English language while ensuring focus on all these four skills provides a platform for the learners to hone their proficiency in this language well.

Components in the language lab:

- Teacher has a computer with Clarity for conducting language exercises
- Teacher and students wear headsets that block outside sounds and disturbances
- Students have a media player/recorder for listening to audio and recording speech
- Teacher and student positions are connected via LAN (local area network), in some cases also via separate audio cabin.

## Report on Iodine Deficiency Day

Respected sir/madam,

The DWEC of Dadi Institute of Engineering & Technology (DIET) has successfully conducted **Iodine Deficiency Day** on 21.10.2019 at DIET Campus to raise awareness among the young graduates about the serious health consequences posed by the deficiency.

Sharing the symptoms of iodine deficiency, Dr Ch S Naga Prasad, Principal of DIET highlighted that Iodine deficiency is a health-related condition in which iodine availability is insufficient to meet the body's needs and which can be present with or without anemia. He further explained that Iodine is essential for the healthy functioning of the whole body, including that of the heart, muscles and red blood cells. It also plays an important role for the optimum mental and physical health, and to keep energy levels up.

Ms S.Shabeena, Assistant Professor of Electronics and Communications Engineering in her presentation threw light on Iodine Deficiency Disorders and how Iodine deficiency impairs the cognitive development of children from infancy through to adolescence. Besides, she emphasized that it damages immune mechanisms and is associated with increased morbidity rates.

Mrs.G.Sujatha -DWEC Convener along with the respective Departmental DWEC Coordinators, Dr Ch S Naga Prasad, Principal, Sri Dadi Ratnakar- Chairman, faculty and more than seventy students participated in the programme.

## **Awareness session on E-Cap Software**

Welcome to the presentation of Engineering College Automation Package, designed and developed by Webpros Solutions Pvt Ltd, Visakhapatnam. The software herein after referred as ECAP, fulfills all the requirements of Engineering Colleges including integrated campuses offering Undergraduate and Post Graduate Courses. ECAP aims at immediate availability of data in required formats, ease the work of Students, staff and management and increase in transparency and accountability in administration.

The ECAP personalizes the education experience for each student, empowering them to connect their academics and extracurriculars with their unique skills, interests, and values.

The ECAP is meant to enable students to develop self-knowledge, skills and self-awareness so they can make informed decisions and become future ready.

Students identify their secondary and post-secondary plans and create a portfolio that highlights their completed activities, skills and knowledge developed during the ECAP process.

The academic component involves planning coursework in alignment with high school requirements, recording postsecondary education goals and academic achievements/awards.

The career aspect entails exploring career opportunities, identifying career goals aligned to students' personal interests, values and skills and exploring any educational requirements needed to achieve career goals.

Although students are encouraged to take charge of their ECAP process, they should seek guidance from their families, guardians, teachers and counsellors when developing their ECAP.
