Dadi Institute of Engineering & Technology

The language laboratory plays an important role in the language learning process. The focus is on the analysis and evaluation of receptive & productive skills based on various task-based/machine-based activities. It also focused on the development of target and scenario-

based communication processes using correct English for language learning purposes. It focuses on the development of students' language & communication skills, critical thinking, and problem-solving skills through the understanding of 4 pillars of English language viz.

Listening, Speaking, Reading and Writing.

Listening Skills

Listening is a receptive language skill which learners usually find the most difficult. This often is because they feel under unnecessary pressure to understand every word. The listener has to get oriented to the listening portion and be all ears. The listener is also required to be attentive. Anticipation is a skill to be nurtured in listening.

In due course of listening, be in a lookout for the sign post words and one should be able to concentrate on understanding the message thoroughly. Listening Skills is enhanced by focusing on making the students listen to the sounds and help them with their right pronunciation of words.

In our Language Lab:

We progress from Attention to Accuracy through Situational Conversations/Roleplay/Development of Argumentative Skills (using BEC audio in the Labs) and then the assessment is carried out.

Speaking

Language is a tool for communication. We communicate with others, to express our ideas, and to know others' ideas as well. We must take into account that the level of language input (listening) must be higher than the level of language production. In primary schools, elocution and recitation are main sources of the sounds, rhythms, and intonation of the English language through simple reproduction. Understanding of para-linguistic attributes such as voice quality, volume and tone, voice modulation, articulation, pronunciation etc helps to better this skill.

What we do?

We initiate with make a presentation on self-followed by the basics of public speaking. Etiquette while following correct voice modulation and acceptable para-linguistic features. As we gear up for our further sessions, we assess the ability of being able to use acquired speaking skills using Extensive-Continuous Evaluation tool. Finally, through self-reflection activity, they will be able to make a comparison in one's evolution in terms of one's communication ability in a semester.

Reading

Reading is a learning skill. It helps you improve all parts of the English language

– vocabulary, spelling, grammar, and writing. It helps to develop language intuition in the corrected form. Then the brain imitates them, producing similar sentences to express the desired meaning. Using skimming or scanning techniques to read quickly is highly effective. While reading, underlining of key words is necessary. Reading skills help the students grasp the content and draw conclusions. The students should also make it a point to familiarize themselves with the jargons and new words by making reading a habit by reading newspapers, articles, books, magazines etc.

What we do and assess in labs?

We expose them to the different techniques of reading and we take them through the practice session through mind map. Then we assess the ability of Reading Comprehension using standard BECR reading Comprehension Using Continuous Evaluation tool.

Writing

Writing provides a learner with physical evidence of his achievements and he can measure his improvement. It helps to consolidate their grasp of vocabulary and structure, and complements the other language skills. It helps to understand the text and write compositions. It can foster the learner's ability to summarize and to set the

language freely. To write flawlessly, one should excel in the Writing Skills with the help of various methods. Importance should be given to composition and creative writing. One should also focus on coherence when it comes to writing a language.

In these sessions, we help them to identify and apply critical thinking skills in writing. Assessment sessions help them to apply language & reflective skills to create a writeup for given iconic images.

Teaching of English language while ensuring focus on all these four skills provides a platform for the learners to hone their proficiency in this language well.

Components in the language lab:

- Teacher has a computer with Clarity for conducting language exercises
- Teacher and students wear headset that blocks out side sounds and disturbances
- Students have a media player/recorder for listening to audio and recording speech
- Teacher and student positions are connected via LAN (local area network), in some cases also via a separate audio cabin.

INTERNATIONAL YOGA DAY 2K21 CELEBRATIONS @ DIET

“Yoga is an invaluable gift of India’s ancient tradition. It embodies unity of mind and body; thought and action; restraint and fulfilment; harmony between man and nature; a holistic approach to health and well-being. It is not about exercise but to discover the sense of oneness with you, the world and the nature. By changing our lifestyle and creating consciousness, it can help in well being.”

In accordance with the guidelines of social-distancing protocol from University Grants Commission (UGC), the NSS Unit of Dadi Institute of Engineering and Technology has organised a virtual yoga session on 21st June, 2021 to encourage students and faculty members to perform 'Yoga at home and Yoga with family.'

On this occasion, students and faculty members demonstrated various asanas at home. Warm up exercises were taken and all the students performed sitting and standing asanas,

importance of these were explained simultaneously by the yoga instructor Ch. Nageswara Rao virtually through Google classroom. The celebrations concluded with the speech by our Principal, Dr C. Narasimham. He encouraged students to practice regular yoga to remain fit and enhance concentration. Further, he opined that regular practice of yoga will surely help our students achieve a better life, physically, mentally and spiritually as well.

AWARENESS PROGRAM ON DWEC

On 12th DECEMBER, 2021

**Organized by
DIET Women Empowerment Cell (DWEC)**

Girl Security works across the United States to ensure the most historically underrepresented and underserved populations of girls have access to financially-supported, cutting-edge programming to prepare them for a future workforce shaped by security challenges that require their leadership

DWEC Co-ordinator S. Vanaja from BS& H Department addressing the gathering & giving awareness about **INTERNAL COMPLAINT COMMITTEE** to 1st year B.Tech students and to follow proper dress code.

National security is one of the largest fields of employment in the United States and encompasses a range of fields across government, industry, academia, and the social sector -- from cybersecurity and AI, to policy and law, to intelligence and the military. It is also the most powerful political realm responsible for the biggest defense budget in the world.. Yet women have remained grossly under-represented for decades, hindering their economic potential and impeding their leadership in this consequential field.

DWEC Co-Convenor O.L.Bhavana from EEE Dept giving guidelines to protect from health issues which are frequently facing by girl students now adays Girl Security is preparing girls, women, and gender minorities for national security through equity-informed learning, transitional high school-to-college training, and relationship-based mentoring. By empowering girls to play a role in security -- where a more secure nation is a more prosperous nation -- girls can fulfill their economic potential and forge an understanding of national security shaped by their lived experiences..

PRINCIPAL sir Dr.CH.NARASIMHAMgaru addressing the gathering and giving guidelines about DWEC Team & to utilize this committee proper manner Decisions made in the name of national security have shaped America and determined the world order. From policy directives that shape industry standards and best practices around cybersecurity, to executive orders that drive diversity, equity, and inclusion as a national security imperative, to wars and spending that shifts the global economy, national security affects everyone. Girl Security works across the United States to ensure the most historically underrepresented and underserved populations of girls have access to financially-supported, cutting-edge programming to prepare them for a future workforce shaped by security challenges that require their leadership.

REPORT:

The DWEC of Dadi Institute of Engineering & Technology (DIET) has successfully conducted **Iodine Deficiency Day** on 21.10.2020 at DIET Campusto raise awareness among the young graduates about the serious health consequences posed by the deficiency.

Sharing the symptoms of iodine deficiency, Dr J Babu, Principal of DIET highlighted that Iodine deficiency is a health-related condition in which iodine availability is insufficient to meet the body's needs and which can be present with or without anemia. He further explained that Iodine is essential for the healthy functioning of the whole body, including that of the heart, muscles and red blood cells. It also plays an important role for the optimum mental and physical health, and to keep energy levels up.

MsS.Shabeena, Assistant Professor of Electronics and Communications Engineering in her presentation threw light on Iodine Deficiency Disorders and how Iodine deficiency impairs the cognitive development of children from infancy through to adolescence. Besides, she emphasized that it damages immune mechanisms and is associated with increased morbidity rates.

Mrs.G.Sujatha-DWEC Convener along with the respective Departmental DWEC Coordinators, Dr ChallaNarasimham, Principal, Sri Dadi Ratnakar- Chairman, faculty and more than seventy students participated in the programme.

Dr. L. Ramesh

The ICT Programming & Logic Essentials course **focuses on fundamental programming concepts**. From this, students will Learn about programming languages and ways to structure a program. Explore problem-solving strategies. Learn about algorithms and programming errors.

Higher education systems have grown exponentially in the last few decades to meet the demands of quality education for all and the last two decades has witnessed the inclusion of ICTs for innovative teaching. Though it is a challenge to holistically integrate the technology in the management and delivery of learning programmes it has become absolutely necessary. It significantly contributes to good quality education and leads to improved student learning and better teaching methods. The introduction of ICTs in the college has had profound implications in the teaching process especially in dealing with key issues of access, equity, management, efficiency, pedagogy and quality.

Report

Respected sir/madam

The DWEC of Dadi Institute of Engineering & Technology (DIET) has successfully conducted **One Day Health Awareness Programme** on 03.09.2021 from 2:00PM onwards at DIET Campus through virtual platform.

The programme commenced with welcome note by Mrs G. Sujatha, Assistant Professor of Computer Science Engineering and Convener of DWEC. The guest speaker Dr. J. Bharathi, MS. D.G.O, Gynaecologist in her lecture highlighted that over 50% of adolescents in the age group of 10 to 19 years in India are, short, thin, overweight or obese because of malnutrition. Besides, explained how adolescent girls especially suffer multiple nutritional deprivations. While more girls suffer from shortness than boys, anemia affects 40% of

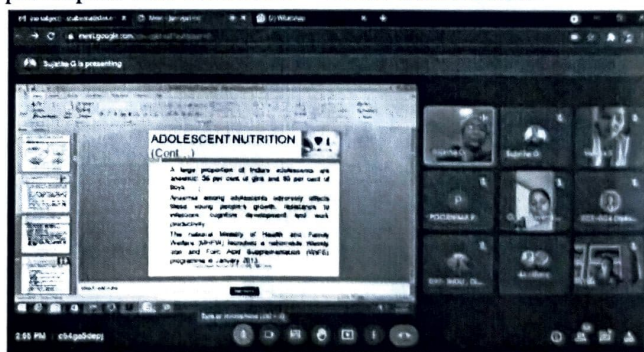

adolescent girls, compared to 18% of boys, and worsens as they get older.

She also threw light on other problems like eating disorders, mental health problems, early pregnancy and child birth, sleep disturbance, Gynecological problems which youth are incessantly facing in today's modern world.

Dr ChallaNarasimham, Principal of DIET in his address emphasized that 'Good nutrition allows children to survive, grow, develop, learn, play, participate and contribute—while malnutrition robs children of their futures and leaves young lives hanging in the balance'. So, advised the students to develop better food habits for their overall development.

Smt. G Sujatha-DWEC Convener along with the respective Departmental Coordinators, Dr ChallaNarasimham, Principal, Sri Dadi Ratnakar- Chairman, faculty and more than eighty four girl students participated in the programme.
