CRITERIA-3

3.1 - Promotion of Research and Facilities

3.1.2 - The institution provides seed money to its teachers for research

Dadi Institute of Engineering & Technology (DIET) is a distinguished institution committed to academic excellence and fostering research and innovation. As part of its strategic initiatives, DIET offers robust Research and Development (R&D) incentives to its faculty members. This program is designed to motivate faculty to actively engage in pioneering research, publish in high-impact journals, and contribute to technological advancements and societal progress. The R&D incentive program at DIET recognizes the significance of academic contributions and promotes a vibrant research culture on campus. Faculty members are encouraged to undertake innovative projects, secure competitive research grants, and collaborate with national and international institutions. These incentives not only acknowledge the effort and dedication of researchers but also provide tangible rewards for their achievements. By offering financial support, professional development opportunities, and recognition for their work, the program seeks to create a conducive environment for groundbreaking discoveries and advancements.

The R&D incentives also encourage collaboration with industries, government agencies, and academic institutions to facilitate knowledge exchange and technology transfer. Training sessions, workshops, and conferences are organized regularly to enhance research skills and keep the faculty updated with the latest developments in their respective fields. By fostering a supportive research ecosystem, DIET not only empowers its faculty but also contributes to the larger goal of nation-building through education, innovation, and technological progress.
