## Speaking

Language is a tool for communication. We communicate with others, to express our ideas, and to know others ideas as well. We must take into account that the level of language input (listening) must be higher than the level of language production. In primary schools, elocution and recitation are main sources to master the sounds, rhythms, and intonation of the English language through simple reproduction. Understanding of paralinguistic attributes such as voice quality, volume and tone, voice modulation, articulation, pronunciation etc helps to better this skill.

What we do?

We initiate with make a presentation on self-followed by the basics of Public speaking; Etiquette while following correct voice modulation and acceptable Paralinguistic features. As we gear up for our further sessions, we assess the ability of being able to use acquired Speaking Skills using Extempore- Continuous Evaluation tool. Finally, through self-reflection activity, they will be able to make a comparison in one's evolution in terms of one's communication ability in a semester.

## Reading

Reading is a learning skill. It helps you improve all parts of the English language – vocabulary, spelling, grammar, and writing. It helps to develop language intuition in the corrected form. Then the brain imitates them, producing similar sentences to express the desired meaning. Using skimming or scanning technique to read quickly is highly effective. While reading underlining of key words is necessary. Reading Skills help the students grasp the content and draw conclusions. The students should also make it a point to familiarize themselves with the jargons and new words by making reading a habit by reading news papers, articles, books, magazines etc

What we do and assess in labs?

We expose them to the different techniques of reading and we take them through the practice session through mir map. Then we assess the ability of Reading Comprehension using standard BEC Reading Comprehension using Continuous Evaluation tool.

### Writing

Writing provides a learner with physical evidence of his achievements and he can measure his improvement. It helps to consolidate their grasp of vocabulary and structure, and complements the other language skills. It helps to understand the text and write compositions. It can foster the learner's ability to summarize and to use the language freely. To write flawlessly in a language one should excel in the Writing Skills with the help of various methods. Importance should be given to composition and creative writing. One should also focus on coherence when it comes to writing a language.

In these sessions, we help them to identify and apply critical thinking skills in writing. Assessment session helps them to apply language & reflective skills to create a write up for given iconic images.

Teaching of English language while ensuring focus on all these four skills provides a platform for the learners to hone their proficiency in this language well.

Components in the language lab:

Teacher has a computer with Clarity for conducting language exercises

Teacher and students wear headsets that block outside sounds and disturbances

Students have a media player/recorder for listening to audio and recording speech

Teacher and student positions are connected via LAN (local area network), in some cases also via separate audio cabin.

## A REPORT ON 4<sup>th</sup> INTERNATIONAL YOGA AWARENESS PROGRAMME

On the eve of international yoga day, the Diet Nss unit conducted yoga day on June 21<sup>st</sup> in the diet college premises. In the event nearly 150 students participated and made several yoga asanas. The yoga instructor Nandala Nagesh who participated and looked after the entire event. He insisted the importance of yoga asanas and their importance to person from small kid to elderly person. He said that he felt very happy that international yoga day had been declared on 21<sup>st</sup> June. It was only by our honorable prime minister Narendra Modi who explained the importance of yoga and requested the committee of UNO who immediately declared June 21<sup>st</sup> as yoga day. The principal said that now a days every one leading mechanical life and ignoring healthcare. So, by doing yoga for half an hour everyday one can keep good physical and mental health.

The yoga instructor Nandala nagesh instructed a student on yoga

## Awareness session on Google classroom

Google Classroom integrates a variety of other Google Applications for Education, such as Google Docs, Google Sheets, Google Slides, Gmail, and Google Calendar into a cohesive platform to manage student and teacher communication. Students can be invited to join a class through a private "class code" or be imported automatically from a school domain. Teachers can create, distribute and mark assignments all within the Google domain. Each class creates a separate folder in the respective user's Google Drive, where the student can submit work to be graded by a teacher. Assignments and due dates are added to Google Calendar, where each assignment can belong to a category or topic. Teachers can monitor each student's progress by reviewing revision history of a document, and after being graded, teachers can return work along with comments and grades. I am sure you have frequently encountered the words like, e-government, e-health, e-shopping, e-business, e-commerce, e-books, e-libraries, e-learning and so on. Almost everything today has gone electronic, while a few years ago World Wide Web was considered a Privilege, today it is a necessity. Everyone can use and learn from electronic devices. ICT today has the power to transform Education.

## OBJECTIVES

After Studying this Unit, you will be able to

- sketch the History of Google class room
- Explain the importance of blended learning
- list examples of different Learning Management Systems
- use learner management system
- explain the importance of e-learning standards

Online Awareness session on google classroom

## GOOGLE CLASS ROOM CONCEPT AND CHARACTERISTICS

Google Classroom integrates several Google Applications for Education (GAPPS) such as Google Drive, Google Docs, Google Sheets, Google

Forms, Google Sites, Gmail to help educational institutions transition to a virtual, paperless system. Google Calendar was later added to help with assignment due dates, field trips, and class speakers. Students can be invited to classrooms through the institution's database, through a private code that can then be added in the student's user interface or automatically imported from a school domain. Each class created with Google Classroom creates a separate folder in the respective user's Google Drive, where the student can submit work to be graded by a teacher

### Assignments

Assignments are stored and graded on Google's suite of productivity applications that allow collaboration between the teacher and the student or between students. Instead of sharing documents that reside on the student's Google Drive with the teacher, files are hosted on the student's Drive and then submitted for grading. Teachers on Google Classroom have the option of creating Assignments in various templates and formats with different accessibility options: "student can view file," "student can edit file," or "make a copy for each student". These assignments can be submitted for a grade and teacher feedback. Students can also choose to

attach additional documents from their Drive to the assignment. Set assignments appear on the 'To do' list.

## **Grading**

Google Classroom supports many different grading schemes. Teachers have the option to attach files to the assignment which students can view, edit, or get an individual copy. Students can create files and then attach them to the assignment if a copy of a file wasn't created by the teacher. Teachers have the option to monitor the progress of each student on the assignment where they can make comments and edit. Turned in assignments can be graded by the teacher and returned with comments to allow the student to revise the assignment and turn back in. Once turned in, assignments can only be edited by the teacher unless the teacher turns the assignment back.

## **Communication**

Announcements can be posted by teachers to the class stream which can be commented on by students allowing for two-way communication between the teacher and students. Students can also post to the class stream but won't be as high a priority as an announcement by a teacher and can be moderated. Multiple types of media from Google products such as YouTube videos and Google Drive files can be attached to announcements and posts to share content. Gmail also provides email options for teachers to send emails to one or more students in the Google Classroom interface. Classroom can be accessed on the web or via the Android and iOS Classroom mobile apps.

## **Originality Report**

Originality report was introduced in January 2020. It allows educators and students to see the parts and sections of the submitted work which contains the exact or similar wording to that of another source. For students, it highlights source materials and flags missing citation to assist the student in improving their writing. Teachers can also view the originality report, allowing them to verify the academic integrity of the student's submitted work. On G Suite for Education (free), teachers can turn on originality report for 3 assignments but have limited cloud storage. This restriction is lifted on G Suite Enterprise for Education (paid).

## **Archive Courses**

Classroom allows instructors to archive courses at the end of a term or year. When a course is archived, it is removed from the homepage and placed in the Archived Classes area to help teachers keep their current classes organized. When a course is archived, teachers and students can view it, but won't be able to make any changes to it until it is restored.

## Mobile Applications

Google Classroom mobile apps, introduced in January 2015, are available for iOS and Android devices. The applications let users take photos and attach them to their assignments, share files from other apps, and support offline access, easing accessibility for users.

eLearning Industry tested and made a review of Google Classroom, in which they highlighted many positive and negative aspects. Among Classroom's strengths, the review highlighted ease of use, universal device accessibility, use of Google Drive as an effective way for teachers to quickly share assignments with students, the paperless process meaning the end of printing, handing out, and potentially losing work, and the fast feedback system between students and teachers. Among Classroom's disadvantages, the review highlighted the service's heavy integration of Google apps and services with limited or no support for external files or services, lack of automated quizzes and tests, and a lack of live chats that can aid in feedback efforts. Google Classroom won a 2020 Webby Special Achievement Award.

Due to the prominence of Google, students find Google Classroom easy to navigate since many are familiar with Google layout. Furthermore, the mobile app for Google Classroom functions well which has been praised by students. If notifications are enabled, the mobile app for Google Classroom can provide push notifications to remind students of upcoming deadlines, a feature that has been received well by students.

Additional research has shown the benefits of using Google Classroom in a blended learning model such as developing self-efficacy skills and attaining learning outcomes.
