(Ministry of Education Initiative)

Venue: Smart Lecture Hall
@09:00 Am
19/05/2023

The main objectives of this session as follows:

- To outline the broad concepts for first startup registration preparation.
- To provide ideas for legal and ethical startup steps, as well as relevant links or information.
- To provide participants with understanding on various legal compliances and obstacles.

This seminar is intended to instill the legal and ethical procedures that should be followed in the business. This session was facilitated by Professor K.Sujatha. She described how various back-end procedures are carried out when an investor proposes, like forming a business or establishing a corporation, dividing the company by founder and co-founder, and many more. It defines the sorts of business structures using several examples, including sole proprietorship, general, limited liability partnership, private limited company, and non-profit corporation, and clarifies the team of co-founders, investors, incubators, and promoters. This session proposed a chance to the students and Faculty members to spread their ability to plan for start-up and various steps involved in legal & Ethical formalities.

Startup India launched Single Use Plastic Grand Challenge to incentivize innovators and Startups to develop design solutions across three problem statements. Through this challenge, proof of concept, prototype development, product trials, market entry and commercialization. Use of renewable energy for quality of life to energy solutions for regions. Easing Public Procurement and Awareness & Outreach. The ranking methodology aims to create a healthy competition among States to further learn, share and adopt best practices. These ideas are very useful to break the startup process into idea generation, opportunity.
