Awareness session on E-Learning

I am sure you have frequently encountered the words like, e-government, e-health, e-shopping, e-business, e-commerce, e-books, e-libraries, e-learning and so on. Almost everything today has gone electronic, while a few years ago World Wide Web was considered a Privilege, today it is a necessity. Everyone can use and learn from electronic devices. ICT today has the power to transform Education. The new millennium heralds exciting opportunities to diversify the ways in which education is offered. A greater flexibility is provided through online access to learning – when, where and how to do it? Today anyone can obtain education anywhere, anytime through online education. Thus, breaking the shackles of traditional classroom and adapting to new and electronic learning Technologies empowers all learners irrespective of their diversities. This development in ICT has resulted in a learning environment called e-learning.

OBJECTIVES

After Studying this Unit, you will be able to

- sketch the History of e-learning
- define e-learning and blended learning
- explain the Characteristics of e-learning
- distinguish between Synchronous and Asynchronous e-learning
- classify the e-learning Technologies
- explain the features of Learning Management System(LMS)
- differentiate LMS from LCMS
- list the advantages and Limitations of e-learning
- list examples of different Learning Management Systems
- use learner management system
- explain the importance of e-learning standards

E-learning - CONCEPT AND CHARACTERISTICS

What is eLearning?

E-learning is essentially imparting education through computer and network enabled digital technologies which include among other things, internet, intranet, computer, satellite TV, CDROM, audio and video resources.

The term e-learning was first used in the professional environment in the year 1999 at CBT Seminar at Los Angeles. Therefore e-learning could be broadly defined as use of Information and Communication Technology (ICT) to enhance and support learning. This could range from teachers and students using e-mail for communication to entirely online courses. This term is used synonymously with virtual learning, online learning, computer based learning, web based learning, and networked learning.

E-learning is defined by many people, in many ways, since the term e-learning is used inconsistently, in order to gain a clear understanding of what e-learning is, here are a few definitions of e-learning.

The letter "e" in e-learning stands for the word "electronic", e-learning would incorporate all educational activities that are carried out by individuals or groups working online or offline via networked or standalone computers and other electronic devices.

- Brandon Hall defines E-learning as: "...instruction that is delivered electronically, in part or wholly via a Web browser, through the Internet or an intranet, or through multimedia platforms such as CD-ROM or DVD."
- Rosenberg: "E-learning refers to the use of Internet technologies to deliver a broad array of solutions that enhance knowledge and performance." Rosenberg claims that e-learning is based on three fundamental criteria:

DADI INSTITUTE OF ENGINEERING & TECHNOLOGY

(Approved by A.I.C.T.E & Affiliated to JNTU, Kakinada)
ISO 9001:2008; ISO 14001:2004 & OHSAS 18001:2007 Certified Institution
NH-5, Anakapalle-531002, Visakhapatnam, A.P

- E-learning is networked, instant updating, storage and retrieval, distribution and sharing of information is therefore possible.
 - E-learning is delivered to the end-user via a computer using standard internet technologies.
 - E-learning focuses on the broadest view of learning: Learning solutions going beyond the traditional paradigms of training.
 - E-learning involves the use of a computer or electronic device (e.g. a mobile phone) in some way to provide training, educational or learning material.
-
- Defines e-learning as: Web-based training (WBT), also known as e-learning and on-line learning, is training that resides on a server or host computer that is connected to the World Wide Web.
 - "E-learning refers to educational processes that utilise information and communications technology to mediate synchronous as well as asynchronous learning and teaching activities"
 - "E-learning is the use of new multimedia technologies and the Internet to improve the quality of learning by facilitating access to resources and services, as well as remote exchange and collaboration."
 - "E-learning is the delivery of education (all activities relevant to instructing, teaching, and learning) through various electronic media"

Thus, E-Learning is the use of technology to enable people to learn anytime and anywhere. E-learning can include training, the delivery of just-in-time information and guidance from experts. E-learning could also be considered distance education in an evolved form, which has taken advantages of all the emerging technologies for enhancing learning experiences of every learner. In that sense e-learning could be considered as a new generation of distance education.

Characteristics of E- learning

- **E-learning is Learner-Centric Learning:** The learner centric e-learning model makes an array of resources available to the learner, who is free to choose when, where and how to learn.

- **E-learning for lifelong learning:** With increasing access to technologies and its ever increasing sophistication this approach to learning facilitates lifelong learning among various stake holders.
- **E-learning is Flexible Learning:** E-learning has historically been linked with distance education and flexible learning. In distance education, various technologies can be used to link learners, instructors and resources that are removed in time or space. The hallmark of flexible learning, as its name suggests, is its adaptability to learners' needs and circumstances.
- **E-learning is Social:** E-learning seeks to foster collaboration and peers interaction. Various e-learning technologies facilitate various types of collaboration among learners and teachers.
- **E-learning Involves Learning Objects:** E-learning uses reusable learning objects. This RLO permits one to create e-learning course with ease.
- **E-learning is Personalized:** Usually e-learning system permits its users to personalize the learning by tailoring its offerings to their learning style, job requirements, career goals, current knowledge and personal preferences.
- **E-learning Involves Effective Communication:** The effectiveness of e-learning also depends on establishing two-way communication between teachers and learners, and among learners themselves. There are many standalone tools as well as learner management system integrated tools to foster interactive and collaborative engagement.

Impact of E-

learning:

- Social interaction and connectedness through different digital and online platforms.
- Exploring more global e-resources including lecture series, e-book, online documents and journals.
- Increase IT skills in all the stakeholders related to teaching learning system.
- Flexible learning for all.
- Enhanced research collaboration with global institutes.
- Wide global conference, webinar, conclaves, meeting and discussion in digital platforms.
- Connecting large no of people in a single digital platform within a very short intervals of time.
- Economically disadvantage students, physically challenged and all other get benefited through these digital platforms.

REPORT

Respected sir/madam

This is to inform you that we have conducted Health Awareness & Women Empowerment Program for all the girl students & lady faculty to bring awareness on hygiene and maintenance of good health.

Prof.P.NARASHIMHA RAJU, Department of BS&H addressed the students on the importance of women empowerment. He emphasized that women plays an important role in the development of individual family in turn the society.

Further, Prof. M. Lalitha, Department of BS&H addressed the student community on how to adopt oneself to maintain hygienic and good health. Girl students have to take food which improves their HB which in turn makes them to be healthy and energetic.

Department Women Empowerment Cell thanked Sri Dadi Ratnakar, Correspondent & Secretary, Dr. M. Venu Gopala Rao, Principal, DIET, Dr. K. Amarendra, Vice Principal and Professor M. Babitha Jain, Dean Academics for being a part and making this program grand success.

Our special thanks to Dr.K.Rama Rao, Dean Admin who provided all the necessary facilities for the smooth conduct of the program.

Prof.P.NARASHIMHA RAJU, Department of BS&H addressing the students

Prof. M. Lalitha, Department of BS&H addressing the student

TRAINING & PLACEMENT CELL cordially invites students of

II B.Tech for

Language Skill Development Program

From 01-08-2016 to 13-08-2016

VENUE : Communication lab & Seminar hall-1

**PRINCIPAL
DIET**

The language skill development program plays an important role in the language learning process.

The focus is on the analysis and evaluation of receptive & productive skills based on various task- based/machine-based activities. It also focused on the development of target and scenario-based communication processes using correct English for language learning purposes. It focuses on the development of students' language & communication skills, critical thinking, and problem solving skills through the

understanding of 4 pillars of English Language viz. Listening, Speaking, Reading and Writing.

Listening Skills

Listening is a receptive language skill which learners usually find the most difficult. This often is because they feel under unnecessary pressure to understand every word. The listener has to get oriented to the listening portion and be **all ears**. The listener is also required to be attentive. Anticipation is a skill to be nurtured in Listening.

In due course of listening, be in a lookout for the sign post words and one should be able to concentrate on understanding the message thoroughly. Listening Skills is enhanced by focusing on making the students listen to the sounds and help them with the right pronunciation of words.

In our Language Lab:

We progress from Attention to Accuracy through Situational Conversations/Role Play/Development of Argumentative Skills (using BEC audio in the Labs) and then the assessment is carried out.

Speaking

Language is a tool for communication. We communicate with others, to express our ideas, and to know others' ideas as well. We must take into account that the level of language input (listening) must be higher than the level of language production. In primary schools, elocution and recitation are main sources to master the sounds, rhythms, and intonation of the English language through simple reproduction. Understanding of para-linguistic attributes such as voice quality, volume and tone, voice modulation, articulation, pronunciation etc helps to better this skill.

What we do?

We initiate with make a presentation on self- followed by the basics of Public speaking; Etiquette while following correct voice modulation and acceptable Paralinguistic features. As we gear up for our further sessions, we assess the ability of being able to use acquired Speaking Skills using Extempore- Continuous Evaluation tool.

Finally, through self-reflection activity, they will be able to make a comparison in one's evolution in terms of one's communication ability in a semester

Reading

Reading is a learning skill. It helps you improve all parts of the English language – vocabulary, spelling, grammar, and writing. It helps to develop language intuition in the corrected form. Then the brain imitates them, producing similar sentences to express the desired meaning. Using skimming or scanning technique to read quickly is highly effective. While reading underlining of key words is necessary. Reading Skills help the students grasp the content and draw conclusions. The students should also make it a point to familiarize themselves with the jargons and new words by making reading a habit be

it reading newspapers, articles, books, magazines etc

What we do and assess in labs?

We expose them to the different techniques of reading and we take them through the practice session through mind map. Then we assess the ability of Reading Comprehension using standard BEC Reading Comprehension using Continuous Evaluation tool.

Communication lab at 4th Floor

Writing

Writing provides a learner with physical evidence of his achievements and he can measure his improvement. It helps to consolidate their grasp of vocabulary and structure, and complements the other language skills. It helps to understand the text and write compositions. It can foster the learner's ability

to summarize and to use the language freely. To write flawless language one should excel in the Writing Skills with the help of various methods. Importance should be given to composition and creative writing. One should also focus on coherence when it comes to writing a language.

In these sessions, we help them to identify and apply critical thinking skills in writing. Assessment session helps them to apply language & reflective skills to create a write up for given iconic images.

Teaching of English language while ensuring focus on all these four skills provides a platform for the learners to hone their proficiency in this language well.

Awareness session on Google classroom

Google Classroom integrates a variety of other Google Applications for Education, such as Google Docs, Google Sheets, Google Slides, Gmail, and Google Calendar into a cohesive platform to manage student and teacher communication. Students can be invited to join a class through a private "class code" or be imported automatically from a school domain. Teachers can create, distribute and mark assignments all within the Google domain. Each class creates a separate folder in the respective user's Google Drive, where the student can submit work to be graded by a teacher. Assignments and due dates are added to Google Calendar, where each assignment can belong to a category or topic. Teachers can monitor each student's progress by reviewing revision history of a document, and after being graded, teachers can return work along with comments and grades. I am sure you have frequently encountered the words like, e-government, e-health, e-shopping, e-business, e-commerce, e-books, e-libraries, e-learning and so on. Almost everything today has gone electronic, while a few years ago World Wide Web was considered a Privilege, today it is a necessity. Everyone can use and learn from electronic devices. ICT today has the power to transform Education.

OBJECTIVES

After Studying this Unit, you will be able to

- sketch the History of Google class room
- Explain the importance of blended learning
- list examples of different Learning Management Systems
- use learner management system
- explain the importance of e-learning standards

GOOGLE CLASSROOM CONCEPT AND CHARACTERISTICS

Google Classroom integrates several Google Applications for Education (GAPPS) such as Google Drive, Google Docs, Google Sheets, Google Slides, Google

Forms, Google Sites, Gmail to help educational institutions transition to a virtual, paperless system.[19] Google Calendar was later added to help with assignment due dates, field trips, and class speakers. Students can be invited to classrooms through the institution's database, through a private code that can then be added in the student's user interface or automatically imported from a school domain. Each class created with Google Classroom creates a separate folder in the respective user's Google Drive, where the student can submit work to be graded by a teacher

Assignments

Assignments are stored and graded on Google's suite of productivity applications that allow collaboration between the teacher and the student or between students. Instead of sharing documents that reside on the student's Google Drive with the teacher, files are hosted on the student's Drive and then submitted for grading. Teachers on Google Classroom have the option of creating Assignments in various templates and formats with different accessibility options: "student can view file," "student can edit file," or "make a copy for each student". These assignments can be submitted for a grade and teacher feedback. Students can also choose to attach additional documents from their Drive to the assignment. Set assignments appear on the 'To do' list.

Grading

Google Classroom supports many different grading schemes. Teachers have the option to attach files to the assignment which students can view, edit, or get an individual copy. Students can create files and then attach them to the assignment if a copy of a file wasn't created by the teacher. Teachers have the option to monitor the progress of each student on the assignment where they can make comments and edit. Turned in assignments can be graded by the teacher and returned with comments to allow the student to revise the assignment and turn back in. Once turned in, assignments can only be edited by the teacher unless the teacher turns the assignment back.

Communication

Announcements can be posted by teachers to the class stream which can be commented on by students allowing for two-way communication between the teacher and students.[22] Students can also post to the class stream but won't be as high a priority as an announcement by a teacher and can be moderated. Multiple types of media from Google products such as YouTube videos and Google Drive files can be attached to announcements and posts to share content. Gmail also provides email options for teachers to send emails to one or more students in the Google Classroom interface. Classroom can be accessed on the web or via the Android and iOS Classroom mobile apps.

Originality Report

Originality report was introduced in January 2020. It allows educators and students to see the parts and sections of the submitted work which contains the exact or similar wording to that of another source. For students, it highlights source materials and flags missing citation to assist the student in improving their writing. Teachers can also view the originality report, allowing them to verify the academic integrity of the student's submitted work. On G Suite for Education (free), teachers can turn on originality report for 3 assignments but have limited cloud storage. This restriction is lifted on G Suite Enterprise for Education (paid).

Archive Courses

Classroom allows instructors to archive courses at the end of a term or year. When a course is archived, it is removed from the homepage and placed in the Archived Classes area to help teachers keep their current classes organized. When a course is archived, teachers and students can view it, but won't be able to make any changes to it until it is restored.

Mobile Applications

Google Classroom mobile apps, introduced in January 2015, are available for iOS and Android devices. The applications let users take photos and attach them to their assignments, share files from other apps, and support offline access, easing accessibility for users.

eLearning Industry tested and made a review of Google Classroom, in which they highlighted many positive and negative aspects. Among Classroom's strengths, the review highlighted ease of use, universal device accessibility, use of Google Drive as an effective way for teachers to quickly share assignments with students, the paperless process meaning the end of printing, handing out, and potentially losing work, and the fast feedback system between students and teachers. Among Classroom's disadvantages, the review highlighted the service's heavy integration of Google apps and services with limited or no support for external files or services, lack of automated quizzes and tests, and a lack of live chats that can aid in feedback efforts.[28] Google Classroom won a 2020 Webby Special Achievement Award.

Due to the prominence of Google, students find Google Classroom easy to navigate since many are familiar with Google layout. Furthermore, the mobile app for Google Classroom functions well which has been praised by students. If notifications are enabled, the mobile app for Google Classroom can provide push notifications to remind students of upcoming deadlines, a feature that has been received well by students

Additional research has shown the benefits of using Google Classroom in a blended learning model such as developing self-efficacy skills and attaining learning outcomes.

LISTENING SKILLS

Introduction: Listening is the act of hearing attentively. Research shows that 45% of our time is spent on listening. We listen more than speak. If this listening skill is used in a proper way we can master the tools of communicative skills. Listening is difficult, as human mind tends to distract easily. A person who controls his mind and listens attentively acquires various other skills and is benefited.

Objectives:

- Understanding listening skills
- Practicing Phonetics
- Improving Communication skills

Importance of Listening Skills

: Listening skill makes you successful in workplace, family and in the society. Good listening skill is mandatory to get into a profession in communications, management, planning, sales, etc. Listening skills involve a different set of etiquettes, questioning for explanation, showing empathy and providing a suitable response.

LISTENING PROCESS

: There are six stages in listening process - hearing, attending, understanding, remembering, evaluating, and responding. These stages occur in sequence, but they generally performed with little awareness an often rapid succession

- ❖ Hearing - it refers to the response caused by sound waves stimulating the sensory receptors of the ear; it is physical response; hearing is perception of sound waves; you must hear to listen, but you need not listen to hear.
- ❖ Attention- brain screens stimuli and permits only a select few to come into focus- these selective perception is known as attention, an important requirement for effective listening; strong stimuli like bright lights, sudden noise...are attention getters.
- ❖ Understanding- to understand symbols we have seen and heard, we must analyse the meaning of the stimuli we have perceived; symbolic stimuli are not only words but also sounds like applause... and

sights like blue uniform...that have symbolic meanings as well; the meanings attached to these symbols are a function of our past associations and of the context in which the symbols occur; for successful interpersonal communication, the listener must understand the intended meaning and the context assumed by the sender.

- ❖ Remembering- it is important listening process because it means that an individual has not only received and interpreted a message but has also added it to the mind's storage bank; but just as our attention is selective, so too is our memory- what is remembered may be quite different from what was originally seen or heard.
- ❖ Evaluating- it is a stage in which active listeners participate; it is at these point that the active listener weighs evidence, sorts fact from opinion, and determines the presence or absence of bias or prejudice in a message;
- ❖ Responding- this stage requires that the receiver complete the process through verbal and/or nonverbal feedback; because the speaker has no other way to determine if a message has been received, this stage becomes the only overt means by which the sender may determine the degree of success in transmitting the message.

Types of Listening:

- Whole-person listening-understanding the speaker, his words, thought, motive etc.
 - Appreciative Listening- Listening for appreciation and pleasure.
 - Attentive Listening –attentively listening each and every word.
 - Casual Listening- Listening not very attentive, listening casually without any interest.
 - Evaluative Listening- Listening to evaluate or judge something.
-
- ❖ Selective listening: We all listen selectively at some time or other.
 - ❖ Talking speed vs. speed of thought: There is a considerable difference between the speed at which people talk and the speed at which they think.
 - ❖ Lack of interest: This could be due to lack of interest in the individual speaking or being distracted by things that are happening to you personally.
 - ❖ Beliefs and attitudes: we all have opinions on a variety of current issues; we feel strongly about certain subjects; we value certain behaviours.
 - ❖ Preconceptions: Our preconceptions often mean we don't even give another person a chance to speak. We can prejudge what they have to say.

- ✓ Have eye contact with the speaker.
- ✓ Sit straight and adopt a posture to tell the speaker that you are listening.
- ✓ Show some gesture which represents attentive learning, for example nodding of the head.
- ✓ Verbal responses while listening shows that you are a good listener.
- ✓ Wait for the speaker to complete his speech and then share your views, don't interrupt him.
- ✓ Try to concentrate on the complete speech.
- ✓ Do not give your views unless you are asked to do so.

PHONETICS:

Phonetics is the scientific study of speech sounds. It is a fundamental branch of Linguistics. Received Pronunciation (RP) is a form of pronunciation of the English language which has traditionally been the prestige British accent. RP is a form of English. The Sounds of English and Their Representation: In English, there is no one-to-one relation between the system of writing and the system of pronunciation. The alphabet which we use to write English has 26 letters but in English there are approximately 44 speech sounds. To represent the basic sound of spoken languages linguists use a set of phonetic symbols called the International Phonetic Alphabet (IPA). Consonants are 24 in numbers. And there are twenty distinctive vowel sounds, made up of twelve pure vowels or monophthongs and eight vowel diphthongs (glides).

Classification of Sounds in English

The English alphabet has 26 letters out of which 5 are vowels and the rest are consonants. These letters and letter combinations give rise to 44 sounds. These 44 sounds are divided into 20 vowel sounds (i.e., 12 pure vowels and 8 diphthongs) and 24 consonants. They are as follows:

Vowels

Vowels are the sounds in the production of which there is no obstruction of air. They are produced with the vibration of vocal cords and the air passes freely through the mouth. All vowels are voiced sounds.

There are altogether 20 vowel sounds, out of which 12 are pure vowels and 8 are diphthongs.

Consonants

Consonants are the sounds in the production of which there is obstruction of air. They are not produced with the vibration of vocal cords and the air doesn't move freely through the mouth. In the words of Christopherson a consonant may be defined as a sound in which the movement of air from the lungs is obstructed a result of a narrowing or a complete closure of the air passage. Consonants include all breathed sounds, certain voiced sounds, accompanied by a frictional noise and certain sounds which are gliding.

There are altogether 24 consonant sounds. They are as follows:

Voiced and Voiceless Sounds

A vibrating sound is called a voiced sound and a sound without vibration is called voiceless. If we plug our ears with our fingers and produce the two sounds such as bee and pea, we hear a buzzing sound for bee and it is called a voiced sound. But in the production of the word pea, there is not buzzing sound and hence it is called a voiceless sound. Most voiceless consonants have their corresponding voiced consonants.

READING COMPREHENSION

Objectives

To understand the interaction between the words that are written and how they trigger knowledge.

Description

Effective communication skills are always essential in our academic as well as professional career. They are more vital these days amidst the phenomenal advancement in technology globalization, increasing cultural diversity. Among the four basic skills, reading skill is an important communicative process and reading skills are probably the most important language skills required for academic and professional purposes.

What is reading comprehension?

The purpose of reading is to connect the ideas on the page to what we already know. Reading comprehension refers to the ability to understand information presented in written form.

Techniques for good comprehension

- ✓ Skimming (quick reading)
- ✓ Scanning (looking for specific information)
- ✓ Non-verbal signals (fonts, bold print heading, figures etc.)
- ✓ Structure of the text (introduction, body conclusion etc)
- ✓ Structure of paragraphs (topic sentence, develop the aspect summary etc)
- ✓ Punctuation
- ✓ Author's viewpoints
- ✓ Reading anticipation: determining the meaning of words
- ✓ Summarizing.

Reading methods

Two reading methods that can be used effectively for reading scientific and technical texts are ERRQ and SQ3R techniques.

ERRQ reading technique has four stages, i.e. Estimate, Read, Respond, and Question. The basic purpose of this strategy is to get the reader to link what he/she has with new information. This technique might be useful for reading any kind of text.

SQ3R ensures high degree of understanding and remembrance. It has five stages, i.e., Survey, Question, Read, Recall, and Revise.

Reading comprehension is phenomenal and crucial in assessing language skills in various entrance examinations.

Conclusion: The students will get the ability to recognize words quickly and effortlessly. Over time, the students gain more and more responsibility for using the strategies until they can use them independently.

Example

Horse owners who plan to breed one or more mares should have a working knowledge of heredity and know how to care for breeding animals and foals. The number of mares bred that actually conceive varies from about 40 to 85 percent, with the average running less than 50 percent. Some mares that do conceive fail to produce living foals. This means that, on average, two mares are kept a whole year to produce one foal, and even then, some foals are disappointments from the standpoint of quality. By careful selection, breeders throughout history have developed various kinds of horses with a wide variety of characteristics to suit many different needs. The Great Horse of the Middle Ages, for example, was bred for size and strength to carry a heavily armoured knight. The massive horses of such breeds are often called "cold blooded." The Arabs bred lithe desert horses that were small and swift. These animals are often referred to as "hot blooded." Cross-breeding of hot blooded and cold-blooded horses for certain characteristics produced breeds ranging from riding horses to draft horses. The Thoroughbred is considered by many to be the highpoint of elegance and fine selective breeding. Many persons mistakenly apply the name Thoroughbred to any purebred horse. But a Thoroughbred is a distinct breed of running horses that traces its ancestry through the male line directly back to three Eastern stallions: the Byerly Turk, the Darley Arabian, and the Godolphin Barb. For convenience the breeds of horses are often divided into three major groups: (1) ponies, (2) heavy, or draft horses, and (3) light horses.

A. Questions: (10)

1. Which of the following is not an example of an Eastern stallion?

- (A) Byerly Turk
- (B) Darley Arabian
- (C) Thoroughbred
- (D) Godolphin Barb

అసరావల్లి, జూన్ 21, ప్రభాతపాఠ్

స్థానిక డైట్ కళాశాలలో నాల్గవ అంతర్జాతీయ యోగా దినోత్సవాన్ని ఘనంగా నిర్వహించారు. డైట్ ఎస్ఎస్ఎస్ అధ్యక్షులలో జరిగిన ఈ కార్యక్రమానికి వట్టాంబలోని ప్రముఖ యోగా గురువు సంద్యాల నగేష్ చోటాల్ విద్యార్థులకు యోగా విద్యలో శిక్షణనిచ్చారు. ఈ సందర్భంగా నగేష్ మాట్లాడుతూ భారతీయ యోగా కళకు ప్రపంచ గుర్తింపు లభించడం యోగా శిక్షకుడిగా తనకెంతో ఆనందాన్ని కలుగజేస్తుందన్నారు. యోగా సాధన ద్వారా అనేక ఆనారోగ్య సమస్యల్ని దూరం చేసుకొని ఆరోగ్యవంతమైన జీవితాన్ని గడవవచ్చని తెలిపారు. విధిగా వివిధ ఆసనాలను క్షయం తప్పకుండా చేస్తే మనస్ పుష్కలమై ఉత్సాహంగా ఉత్సాహంగా ఉంటాడని తెలిపారు. కళాశాల కరస్పాండెంట్ డా. రత్నావతి మాట్లాడుతూ యాంత్రిక జీవితాన్ని గడుపుతున్నటువంటి నేటితరం ఎంతో అలసటకు గురవుతుందన్నారు. ఈ అలసట నుంచి ఉపశమనం పొందడానికి యోగా సాధన సరైన మార్గమన్నారు. సంపూర్ణ ఆరోగ్యాన్ని కోరుకునేటటువంటి ప్రతిఒక్కరూ యోగాని అభ్యసించాలని కోరారు. ఈ కార్యక్రమంలో ఎస్ఎస్ఎస్ డైరెక్టర్ ప్రొఫెసర్ కె.ఎస్.ఈశ్వరరావు, కళాశాల ఇన్చార్జ్ ప్రొఫెసర్ ప్రొఫెసర్ సిహెచ్.ప్రభాకరరావు, ఎస్ఎస్ఎస్ ప్రొఫెసర్ ఆఫీసర్ పి.వి.మురళి, వివిధ విభాగాల అధ్యక్షులు, విద్యార్థులు పాల్గొన్నారు.

Dadi Ratnakar, secretary and correspondent who inaugurated and also participated in the practice session felt that yoga can make an important contribution in achieving a healthy life and promoting well being for all at a time when the world is striving to achieve sustainable development goals.

Incharge Principal Dr. Ch. Prabhakara rao felt that only way for students to gain concentration is the practice of Yoga and meditation and urged them to inculcate it into their regular schedules so that they can stabilize the body, mind and emotions.

Mr. Venkata Murali Palla, NSS program officer said that regular practice of yoga imparts a lasting sense of joy, peace and fulfillment and also relieves one from chronic ailments and improves health.

Yoga has been inculcated as part of curriculum at DIET and students are made to practice Yoga

A report on
INTERNATIONAL YOGA DAY

Yoga Asanas

On

21/06/2019.

“Yoga is an invaluable gift of India’s ancient tradition. It embodies unity of mind and body; thought and action; restraint and fulfillment; harmony between man and nature; a holistic approach to health and well-being. It is not about exercise but to discover the sense of oneness with you the world and the nature. By changing our lifestyle and creating consciousness, it can help in well being.”

The International Day of Yoga has been celebrated annually on 21 June since 2015, following its inception in the United Nations General Assembly in 2014. Yoga is a physical, mental and spiritual practice which originated in India. The Indian prime Minister, Narendra Modi, has UN address in 2014 had suggested the date of 21st June, as it is the longest day of the year in the Northern Hemisphere and shares a special significance in many parts of the world.

Yoga is an invaluable gift of India's ancient tradition. It embodies unity of mind and body; thought and action; restraint and fulfillment; harmony between man and nature; a holistic approach to health and well-being. It is not about exercise but to discover the sense of oneness with yourself, the world and the nature. By changing our lifestyle and creating consciousness, it can help in well being. Let us work towards adopting an International Yoga Day.

It is the responsibility of everyone to have an awareness about the benefit and importance of Yoga. 40 students participated in the event along with teaching and non teaching staff.

as the first multicultural and co-educational college in Anakapalle. DIET is the top ranked Engineering and Management Institute affiliated to JNTUK accredited by NAAC. The college is certified by ISO and associated with many professional bodies in the field of Engineering and Technology. DIET strives for promoting the highest standards among students enabling them to build a new world. We are thankful to Sri Dadi Ratnakar garu, Secretary & Correspondent for encouraging our idea of conducting this program and support given for organising the Health Awareness Program.

Sri Dadi Ratnakar, honourable Correspondent and Secretary conveyed his best wishes to the team and assured his best support for conducting the Health Awareness Program. Dr Ch S Naga Prasad, Principal, Dr. K S Eswar Rao, Vice principal, Smt. G Sujatha, DWEC Convener along with the Chief Guest Dr. Ch. Sailaja, M.S.(OBG), Gyneacologist, Assistant Professor in Andhra Medical College(AMC) have participated in the Program. Dr Ch S Naga Prasad addressed students and suggested them to know about health awareness.

Smt. G Sujatha, DWEC Convener of the event specified the importance of gathering and women health. She has expressed gratitude to management for their best support for conducting the Health awareness program for girl students and women staff.

The chief Guest Dr. Ch Sailaja, M.S.(OBG), Gyneacologist addressed and elaborately explained about the health of the women. She has taken a very good lecture regarding cleanliness and health awareness of the women thorough PPT presentation. After completion of the lecture, we have received questions from the students and Dr. Ch Sailaja Garu has clarified the doubts/questions raised by students very patiently. Some of the students are personally met the doctor for their health issues. The Seminar hall is fully packed with students and listened the lecture with a pin drop silence. Most of the students are very impressed with the program

Report:

Iodine Deficiency Day

on October 20st, 2018

Organized DIET Women Empowerment Cell (DWEC)

The DWEC of Dadi Institute of Engineering & Technology (DIET) has successfully conducted **Iodine Deficiency Day** on 20.10.2018 at DIET Campus to raise awareness among the young graduates about the serious health consequences posed by the deficiency.

Sharing the symptoms of iodine deficiency, Dr Ch S Naga Prasad, Principal of DIET highlighted that Iodine deficiency is a health-related condition in which iodine availability is insufficient to meet the body's needs and which can be present with or without anemia. He further explained that Iodine is essential for the healthy functioning of the whole body, including that of the heart, muscles and red blood cells. It also plays an important role for the optimum mental and physical health, and to keep energy levels up.

MsS.Shabeena, Assistant Professor of Electrical and Electronics Engineering in her presentation threw light on Iodine Deficiency Disorders and how Iodine deficiency impairs the cognitive development of children from infancy through to adolescence. Besides, she emphasized that it damages immune mechanisms and is associated with increased morbidity rates.

CORDIALLY INVITES ALL THE II B. TECH STUDENTS

LANGUAGE SKILL DEVELOPMENT PROGRAM

DATE : 20TH AUGUST, 2018 TO 1ST SEPTEMBER, 2018

COMMUNICATION LAB & SEMINAR HALL-1

TPO
DIET

PRINCIPAL
DIET

The language laboratory plays an important role in the language learning process. The focus is on the analysis and evaluation of receptive & productive skills based on various task-based/machine-based activities. It also focuses on the development of target and scenario-based communication processes using correct English for language learning purposes. It focuses on the development of students' language & communication skills, critical thinking, and problem-solving skills through the understanding of 4 pillars of English Language viz. Listening, Speaking, Reading and Writing.

Listening Skills

Listening is a receptive language skill which learners usually find the most difficult. This often is because they feel under unnecessary pressure to understand every word. The listener has to get oriented to the listening portion and **be all ears**. The listener is also required to be attentive. Anticipation is a skill to be nurtured in Listening.

In due course of listening, be in a lookout for the sign post words and one should be able to concentrate on understanding the message thoroughly. Listening Skills is enhanced by focusing on making the students listen to the sounds and help them with the right pronunciation of words.

In our Language Lab:

We progress from Attention to Accuracy through Situational Conversations/Role Play/Development of Argumentative Skills (using BEC audio in the Labs) and then the assessment is carried out.

Speaking

Language is a tool for communication. We communicate with others, to express our ideas, and to know others' ideas as well. We must take into account that the level of language input (listening) must be higher than the level of language production. In primary schools, elocution and recitation are main sources to master the sounds, rhythms, and intonation of the English language through simple reproduction. Understanding of para-linguistic attributes such as voice quality, volume and tone, voice modulation, articulation, pronunciation etc helps to better this skill.

What we do?

We initiate with make a presentation on self-followed by the basics of public speaking; Etiquette while following correct voice modulation and acceptable Paralinguistic features. As we gear up for our further sessions, we assess the ability of being able to use acquired Speaking Skills using Extempore- Continuous Evaluation tool. Finally, through self- reflection activity, they will be able to make a comparison in one's evolution in terms of one's communication ability in a semester

Reading

Reading is a learning skill. It helps you improve all parts of the English language – vocabulary, spelling, grammar, and writing. It helps to develop language intuition in the corrected form. Then the brain imitates them, producing similar sentences to express the desired meaning. Using skimming or scanning technique to read quickly is highly effective. Whilereading underlining of key words is necessary. Reading Skills help the students grasp the content and draw conclusions. The students should also make it a point to familiarize themselves with the jargons and new words by making reading a habit be it reading newspapers, articles, books, magazines etc.

What we do and assess in labs?

We expose them to the different techniques of reading and we take them through the practicesession through mind map. Then we assess the ability of Reading Comprehension using standard BEC Reading Comprehension Using Continuous Evaluation tool.

Writing

Writing provides a learner with physical evidence of his achievements and he can measure his improvement. It helps to consolidate their grasp of vocabulary and structure, and complements the other language skills. It helps to understand the text and write compositions. It can foster the learner's ability to summarize and to use the

language freely. To write flawless language one should excel in the Writing Skills with the help of various methods. Importance should be given to composition and creative writing. One should also focus on coherence when it comes to writing a language.

In these sessions, we help them to identify and apply critical thinking skills in writing. Assessment session helps them to apply language & reflective skills to create a write up for given iconic images.

Teaching of English language while ensuring focus on all these four skills provides a platform for the learners to hone their proficiency in this language well.

Components in the language lab:

- Teacher has a computer with Clarity for conducting language exercises
- Teacher and students wear headsets that block outside sounds and disturbances
- Students have a media player/recorder for listening to audio and recording speech
- Teacher and student positions are connected via LAN (local area network), in some cases also via separate audio cabin.

Practical application Knowledge on MS-Office

Almost everything today has gone electronic, while a few years ago World Wide Web was considered a Privilege, today it is a necessity. Today, it is essential for the students to learn and master the latest technologies in order to be corporate ready. As a consequence, teachers are combining technology with traditional mode of instruction to engage students in long term learning. College uses Information and Communication Technology (ICT) in education to support, enhance, and optimize the delivery of education. The following tools are used by the Institute.

OBJECTIVES

After participating in this session, you will be able to

- Differentiate between available office tools
- List the advantages and limitations of office tools
- Explain different options
- Use MS-Office efficiently
- Explain the importance of MS-Office standards

MS-OFFICE - CONCEPT AND CHARACTERISTICS

What is MS-OFFICE?

- EMicrosoft Office is a closed-source software office suite containing different applications.
- It was first launched by Bill Gates on 19th November 1990 soon after the launch of Microsoft Windows.
- The first version of MS Office Contained MS Word, MS Excel & MS Powerpoint. While these are called as the Applications.

Welcome to the presentation of Engineering College Automation Package, designed and developed by Webpros Solutions Pvt Ltd, Visakhapatnam. The software herein after referred as ECAP, fulfills all the requirements of Engineering Colleges including integrated campuses offering Undergraduate and Post Graduate Courses. ECAP aims at immediate availability of data in required formats, ease the work of Students, staff and management and increase in transparency and accountability in administration.

The ECAP personalizes the education experience for each student, empowering them to connect their academics and extracurriculars with their unique skills, interests, and values.

The ECAP is meant to enable students to develop self-knowledge, skills and self-awareness so they can make informed decisions and become future ready.

Students identify their secondary and post-secondary plans and create a portfolio that highlights their completed activities, skills and knowledge developed during the ECAP process.

The academic component involves planning coursework in alignment with high school requirements, recording postsecondary education goals and academic achievements/awards.

The career aspect entails exploring career opportunities, identifying career goals aligned to students' personal interests, values and skills and exploring any educational requirements needed to achieve career goals.

Although students are encouraged to take charge of their ECAP process, they should seek guidance from their families, guardians, teachers and counsellors when developing their ECAP.

Report

Respected sir/madam

The DWEC of Dadi Institute of Engineering & Technology (DIET) has successfully conducted **Iodine Deficiency Day** on 21.10.2019 at DIET Campus to raise awareness among the young graduates about the serious health consequences posed by the deficiency.

Sharing the symptoms of iodine deficiency, Dr Ch S Naga Prasad, Principal of DIET highlighted that Iodine deficiency is a health-related condition in which iodine availability is insufficient to meet the body's needs and which can be present with or without anemia. He further explained that Iodine is essential for the healthy functioning of the whole body, including that of the heart, muscles and red blood cells. It also plays an important role for the optimum mental and physical health, and to keep energy levels up.

Ms S.Shabeena, Assistant Professor of Electronics and Communications Engineering in her presentation threw light on Iodine Deficiency Disorders and how Iodine deficiency impairs the cognitive development of children from infancy through to adolescence. Besides, she emphasized that it damages immune mechanisms and is associated with increased morbidity rates.

Mrs.G.Sujatha -DWEC Convener along with the respective Departmental DWEC Coordinators, Dr Ch S Naga Prasad, Principal, Sri Dadi Ratnakar- Chairman, faculty and more than seventy students participated in the programme.

TRAINING & PLACEMENT CELL cordially invites students of

II B.Tech for

Language Skill Development Program

From 07-10-2019 to 19-10-2019

VENUE : Communication lab & Seminar hall-1

**PRINCIPAL
DIET**

The language skill development program plays an important role in the language learning process.

The focus is on the analysis and evaluation of receptive & productive skills based on various task- based/machine-based activities. It also focused on the development of target and scenario based communication processes using correct English for language learning purposes It focuses on the development of students' language & communication skills, critical thinking, and problem solving skills through the understanding of 4 pillars of English Language viz. Listening, Speaking, Reading and Writing.

Listening Skills

Listening is a receptive language skill which learners usually find the most difficult. This often is because they feel under unnecessary pressure to understand every word. The listener has to get oriented to the listening portion and be **all ears**. The listener is also required to be attentive. Anticipation is a skill to be nurtured in Listening.

In due course of listening, be in a lookout for the sign post words and one should be able to concentrate on understanding the message thoroughly. Listening Skills is enhanced by focusing on making the students listen to the sounds and help them with the right pronunciation of words.

In our Language Lab:

We progress from Attention to Accuracy through Situational Conversations/Role Play/Development of Argumentative Skills (using BEC audio in the Labs) and then the assessment is carried

out.

Speaking

Language is a tool for communication. We communicate with others, to express our ideas, and to know others' ideas as well. We must take into account that the level of language input (listening) must be higher than the level of language production. In primary schools, elocution and recitation are main sources to master the sounds, rhythms, and intonation of the English language through simple reproduction. Understanding of para-linguistic attributes such as voice quality, volume and tone, voice modulation, articulation, pronunciation etc helps to better this skill.

What we do?

We initiate with making a presentation on self- followed by the basics of Public speaking; Etiquette while following correct voice modulation and acceptable Paralinguistic features. As we gear up for our further sessions, we assess the ability of being able to use acquired Speaking Skills using Extempore-Continuous Evaluation tool. Finally, through self- reflection activity, they will be able to

make a comparison in one's evolution in terms of one's communication ability in a semester

Reading

Reading is a learning skill. It helps you improve all parts of the English language – vocabulary, spelling, grammar, and writing. It helps to develop language intuition in the corrected form. Then the brain imitates them, producing similar sentences to express the desired meaning. Using skimming or scanning technique to read quickly is highly effective. While reading underlining of key words is necessary.

Reading Skills help the students grasp the content and draw conclusions. The students should also make it a point to familiarize themselves with the jargons and new words by making reading a habit be

it reading newspapers, articles, books, magazines etc

What we do and assess in labs?

We expose them to the different techniques of reading and we take them through the practicesession through mind map. Then we assess the ability of Reading Comprehension using standard BEC Reading Comprehension using Continuous Evaluation tool.

Writing

Writing provides a learner with physical evidence of his achievements and he can measure his improvement. It helps to consolidate their grasp of vocabulary and structure, and complements the other language skills. It helps to understand the text and write compositions. It can foster the learner's ability

to summarize and to use the language freely. To write flawless language one should excel in the Writing Skills with the help of various methods. Importance should be given to composition and creative writing. One should also focus on coherence when it comes to writing a language.

In these sessions, we help them to identify and apply critical thinking skills in writing. Assessment session helps them to apply language & reflective skills to create a write up for given iconic images.

Teaching of English language while ensuring focus on all these four skills provides a platform for the learners to hone their proficiency in this language well.

Components in the language lab:

- Teacher has a computer with Clarity for conducting language exercises
- Teacher and students wear headsets that block outside sounds and disturbances
- Students have a media player/recorder for listening to audio and recording speech
- Teacher and student positions are connected via LAN (local area network), in some cases also via separate audio cabin.

DWEC Co-ordinator S. Vanaja from BS& H Department addressing the gathering & giving awareness about **INTERNAL COMPLAINT COMMITTEE** to Ist year B.Tech students and to follow proper dress code.

National security is one of the largest fields of employment in the United States and encompasses a range of fields across government, industry, academia, and the social sector -- from cybersecurity and AI, to policy and law, to intelligence and the military. It is also the most powerful political realm responsible for the biggest defense budget in the world.. Yet women have remained grossly under-represented for decades, hindering their economic potential and impeding their leadership in this consequential field.

PRINCIPAL sir Dr.CH.NARASIMHAMgaru addressing the gathering and giving guidelines about DWEC Team & to utilize this committee proper manner Decisions made in the name of national security have shaped America and determined the world order. From policy directives that shape industry standards and best practices around cybersecurity, to executive orders that drive diversity, equity, and inclusion as a national security imperative, to wars and spending that shifts the global economy, national security affects everyone. Girl Security works across the United States to ensure the most historically underrepresented and underserved populations of girls have access to financially-supported, cutting-edge programming to prepare them for a future workforce shaped by security challenges that require their leadership.

The ICT Programming & Logic Essentials course focuses on fundamental programming concepts. From this, students will Learn about programming languages and ways to structure a program. Explore problem-solving strategies. Learn about algorithms and programming errors.

Higher education systems have grown exponentially in the last few decades to meet the demands of quality education for all and the last two decades has witnessed the inclusion of ICTs for innovative teaching. Though it is a challenge to holistically integrate the technology in the management and delivery of learning programmes it has become absolutely necessary. It significantly contributes to good quality education and leads to improved student learning and better teaching methods. The introduction of ICTs in the college has had profound implications in the teaching process especially in dealing with key issues of access, equity, management, efficiency, pedagogy and quality.

The programme commenced with welcome note by Mrs G. Sujatha, Assistant Professor of Computer Science Engineering and Convener of DWEC. The guest speaker Dr. J. Bharathi, MS. D.G.O, Gynaecologist in her lecture highlighted that over 50% of adolescents in the age group of 10 to 19 years in India are, short, thin, overweight or obese because of malnutrition. Besides, explained how adolescent girls especially suffer multiple nutritional deprivations. While more girls suffer from shortness than boys, anemia affects 40% of adolescent girls, compared to 18% of boys, and worsens as they get older.

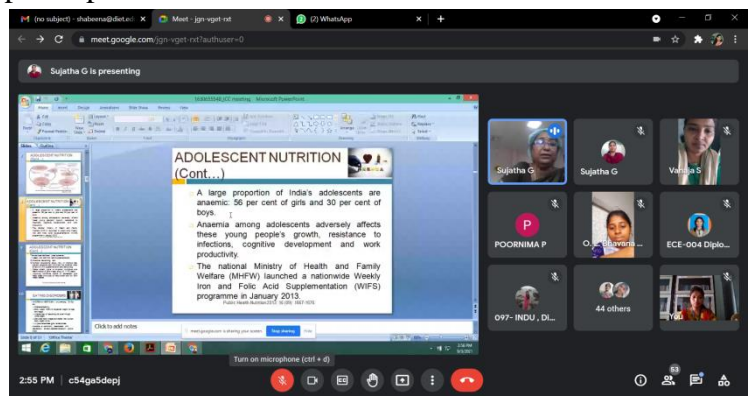

She also threw light on other problems like eating disorders, mental health problems, early pregnancy and child birth, sleep disturbance, Gynecological problems which youth are incessantly facing in today's modern world.

Dr Challa Narasimham, Principal of DIET in his address emphasized that 'Good nutrition allows children to survive, grow, develop, learn, play, participate and contribute—while malnutrition robs children of their futures and leaves young lives hanging in the balance'. So, advised the students to develop better food habits for their overall development.

Smt. G Sujatha-DWEC Convener along with the respective Departmental Coordinators, Dr Challa Narasimham, Principal, Sri Dadi Ratnakar- Chairman, faculty and more than eighty four girl students participated in the programme.

INTERNATIONAL YOGA DAY 2K21 CELEBRATIONS @ DIET

“Yoga is an invaluable gift of India’s ancient tradition. It embodies unity of mind and body; thought and action; restraint and fulfilment; harmony between man and nature; a holistic approach to health and well-being. It is not about exercise but to discover the sense of oneness with you, the world and the nature. By changing our lifestyle and creating consciousness, it can help in well being.”

In accordance with the guidelines of social-distancing protocol from University Grants Commission (UGC), the NSS Unit of Dadi Institute of Engineering and Technology has organised a virtual yoga session on 21st June, 2021 to encourage students and faculty members to perform 'Yoga at home and Yoga with family.'

On this occasion, students and faculty members demonstrated various asanas at home. Warm up exercises were taken and all the students performed sitting and standing asanas,

importance of these were explained simultaneously by the yoga instructor Ch. Nageswara Rao virtually through Google classroom. The celebrations concluded with the speech by our Principal, Dr C. Narasimham. He encouraged students to practice regular yoga to remain fit and enhance concentration. Further, he opined that regular practice of yoga will surely help our students achieve a better life, physically, mentally and spiritually as well.

REPORT:

The DWEC of Dadi Institute of Engineering & Technology (DIET) has successfully conducted **Iodine Deficiency Day** on 21.10.2020 at DIET Campus to raise awareness among the young graduates about the serious health consequences posed by the deficiency.

Sharing the symptoms of iodine deficiency, Dr J Babu, Principal of DIET highlighted that Iodine deficiency is a health-related condition in which iodine availability is insufficient to meet the body's needs and which can be present with or without anemia. He further explained that Iodine is essential for the healthy functioning of the whole body, including that of the heart, muscles and red blood cells. It also plays an important role for the optimum mental and physical health, and to keep energy levels up.

Ms S.Shabeena, Assistant Professor of Electronics and Communications Engineering in her presentation threw light on Iodine Deficiency Disorders and how Iodine deficiency impairs the cognitive development of children from infancy through to adolescence. Besides, she emphasized that it damages immune mechanisms and is associated with increased morbidity rates.

The language laboratory plays an important role in the language learning process. The focus is on the analysis and evaluation of receptive & productive skills based on various task- based/machine-based activities. It also focused on the development of target and scenario-based communication processes using correct English for language learning purposes. It focuses on the development of students' language & communication skills, critical thinking, and problem-solving skills through the understanding of 4 pillars of English Language viz. Listening, Speaking, Reading and Writing.

Listening Skills

Listening is a receptive language skill which learners usually find the most difficult. This often is because they feel under unnecessary pressure to understand every word. The listener has to get oriented to the listening portion and **be all ears**. The listener is also required to be attentive. Anticipation is a skill to be nurtured in Listening.

In due course of listening, be in a lookout for the sign post words and one should be able to concentrate on understanding the message thoroughly. Listening Skills is enhanced by focusing on making the students listen to the sounds and help them with the right pronunciation of words.

In our Language Lab:

We progress from Attention to Accuracy through Situational Conversations/Role Play/Development of Argumentative Skills (using BEC audio in the Labs) and then the assessment is carried out.

Speaking

Language is a tool for communication. We communicate with others, to express our ideas, and to know others' ideas as well. We must take into account that the level of language input (listening) must be higher than the level of language production. In primary schools, elocution and recitation are main sources to master the sounds, rhythms, and intonation of the English language through simple reproduction. Understanding of para-linguistic attributes such as voice quality, volume and tone, voice modulation, articulation, pronunciation etc helps to better this skill.

What we do?

We initiate with make a presentation on self-followed by the basics of public speaking; Etiquette while following correct voice modulation and acceptable Paralinguistic features. As we gear up for our further sessions, we assess the ability of being able to use acquired Speaking Skills using Extempore- Continuous Evaluation tool. Finally, through self- reflection activity, they will be able to make a comparison in one's evolution in terms of one's communication ability in a semester

Reading

Reading is a learning skill. It helps you improve all parts of the English language – vocabulary, spelling, grammar, and writing. It helps to develop language intuition in the corrected form. Then the brain imitates them, producing similar sentences to express the desired meaning. Using skimming or scanning technique to read quickly is highly effective. Whilereading underlining of key words is necessary. Reading Skills help the students grasp the content and draw conclusions. The students should also make it a point to familiarize themselves with the jargons and new words by making reading a habit be it reading newspapers, articles, books, magazines etc.

What we do and assess in labs?

We expose them to the different techniques of reading and we take them through the practicesession through mind map. Then we assess the ability of Reading Comprehension using standard BEC Reading Comprehension Using Continuous Evaluation tool.

Writing

Writing provides a learner with physical evidence of his achievements and he can measure his improvement. It helps to consolidate their grasp of vocabulary and structure, and complements the other language skills. It helps to understand the text and write compositions. It can foster the learner's ability to summarize and to use the

language freely. To write flawless language one should excel in the Writing Skills with the help of various methods. Importance should be given to composition and creative writing. One should also focus on coherence when it comes to writing a language.

In these sessions, we help them to identify and apply critical thinking skills in writing. Assessment session helps them to apply language & reflective skills to create a write up for given iconic images.

Teaching of English language while ensuring focus on all these four skills provides a platform for the learners to hone their proficiency in this language well.

Components in the language lab:

- Teacher has a computer with Clarity for conducting language exercises
- Teacher and students wear headsets that block outside sounds and disturbances
- Students have a media player/recorder for listening to audio and recording speech
- Teacher and student positions are connected via LAN (local area network), in some cases also via separate audio cabin.
